- ENDORSED BY THE OLD COLONY MPO ON JULY 26, 2016
- AS ADJUSTED BY THE OLD COLONY MPO ON JANUARY 17, 2017

#### PREPARED IN COOPERATION WITH:

- THE BROCKTON AREA TRANSIT AUTHORITY (BAT)
- THE MASSACHUSETTS DEPARTMENT OF TRANSPORTATION (MASSDOT)
- THE FEDERAL HIGHWAY ADMINISTRATION (FHWA)
- THE FEDERAL TRANSIT ADMINISTRATION (FTA)

PREPARED BY:
OLD COLONY PLANNING COUNCIL
70 SCHOOL STREET
BROCKTON, MASSACHUSETTS
UNDER MASSDOT CONTRACT 88826

#### **DISCLAIMER**

The preparation of this report has been financed in part through grant[s] from the Federal Highway Administration and Federal Transit Administration, U.S. Department of Transportation, under the State Planning and Research Program, Section 505 [or Metropolitan Planning Program, Section 104(f)] of Title 23, U.S. Code.

The views and opinions of the Old Colony Planning Council expressed herein do not necessarily state or reflect those of the U. S. Department of Transportation.

# 701 CMR 7.00 USE OF ROAD FLAGGERS AND POLICE DETAILS ON PUBLIC WORKS PROJECTS/ 701 CMR

7.00 (the Regulation) was promulgated and became law on October 3, 2008. Under this Regulation, the CMR is applicable to any Public works Project that is performed within the limits of, or that impact traffic on, any Public Road. The Municipal Limitation referenced in this Regulation is applicable only to projects where the Municipality is the Awarding Authority. For all projects contained in the TIP, the Commonwealth is the Awarding Authority. Therefore, all projects must be considered and implemented in accordance with 701 CMR 7.00, and the Road Flagger and Police Detail Guidelines. By placing a project on the TIP, the Municipality acknowledges that 701 CMR 7.00 is applicable to its project and design and construction will be fully compliant with this Regulation. This information and additional information relative to guidance and implementation of the Regulation can be found at the following link on the MassDOT Highway Division website:

http://www.massdot.state.ma.us/Highway/flaggers/main.aspx

#### NOTICE OF NONDISCRIMINATION RIGHTS AND PROTECTIONS TO BENEFICIARIES

#### Federal "Title VI/Nondiscrimination" Protections

The Old Colony Metropolitan Planning Organization (MPO) operates its programs, services, and activities in compliance with federal nondiscrimination laws including Title VI of the Civil Rights Act of 1964 (Title VI), the Civil Rights Restoration Act of 1987, and related statutes and regulations. Title VI prohibits discrimination in federally assisted programs and requires that no person in the United States of America shall, on the grounds of race, color, or national origin (including limited English proficiency), be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity receiving federal assistance. Related federal nondiscrimination laws administrated by the Federal Highway Administration, the Federal Transit Administration, or both prohibit discrimination on the basis of age, sex, and disability. These protected categories are contemplated within the Old Colony MPO's Title VI Programs consistent with federal interpretation and administration. Additionally, the Old Colony MPO provides meaningful access to its programs, services, and activities to individuals with limited English proficiency, in compliance with US Department of Transportation policy and guidance on federal Executive Order 13166.

# **State Nondiscrimination Protections**

The Old Colony MPO also complies with the Massachusetts Public Accommodation Law, M.G.L. c 272 §§ 92a, 98, 98a, prohibiting making any distinction, discrimination, or restriction in admission to or treatment in a place of public accommodation based on race, color, religious creed, national origin, sex, sexual orientation, disability, or ancestry. Likewise, the Old Colony MPO complies with the Governor's Executive Order 526, section 4 requiring all programs, activities, and services provided, performed, licensed, chartered, funded, regulated, or contracted for by the state shall be conducted without unlawful discrimination based on race, color, age, gender, ethnicity, sexual orientation, gender identity or expression, religion, creed, ancestry, national origin, disability, veteran's status (including Vietnam-era veterans), or background.

# **Additional Information**

To request additional information regarding Title VI and related federal and state nondiscrimination obligations, please contact:

Old Colony Planning Council

#### INTRODUCTION

The Transportation Improvement Program (TIP) is a listing of transportation projects proposed for implementation during federal fiscal years 2017, 2018, 2019, 2020, and 2021. The year 2021 is an estimated or hypothetical year, as availability of funds may fluctuate. Projects listed in the TIP include those in the Long Range Element and Short Range Element of the Old Colony Regional Transportation Plan (RTP). In the TIP, projects are programmed under federal and non-federal funding categories. The TIP describes the project as well as its projected costs and funding sources.

#### 701 CMR 7.00 Use of Road Flaggers and Police Details on Public Works Projects

701 CMR 7.00 (the Regulation) was promulgated and became law on October 3, 2008. Under this Regulation, the CMR is applicable to any Public Works Project that is performed within the limits of, or that impact traffic on, any Public Road. The Municipal Limitation referenced in this Regulation is applicable only to projects where the Municipality is the Awarding Authority.

For all projects contained in the TIP, the Commonwealth is the Awarding Authority. Therefore, all projects must be considered and implemented in accordance with 701 CMR 7.00, and the Road Flagger and Police Detail Guidelines. By placing a project on the TIP, the Municipality acknowledges that 701 CMR 7.00 is applicable to its project and design and construction will be fully compliant with this Regulation. This information and additional information relative to guidance and implementation of the Regulation can be found at the following link on the Massachusetts Department of Transportation Highway Division website: <a href="http://www.massdot.state.ma.us/Highway/flaggers/main.aspx">http://www.massdot.state.ma.us/Highway/flaggers/main.aspx</a>

#### 1. Development of the TIP

Annually, the TIP is prepared by the Old Colony Planning Council (OCPC) working cooperatively with the communities within the Old Colony Region, Brockton Area Transit (BAT), Massachusetts Department of Transportation Office of Transportation Planning, and Massachusetts Department of Transportation District 5. Projects are selected from the previous TIP, from the current Comprehensive Economic Development Strategy (CEDS) project list, from proposals made by local officials or citizens, by members of the Old Colony Joint Transportation Committee (JTC), the Massachusetts Department of Transportation, Brockton Area Transit Authority and/ or the OCPC staff itself based on the Regional Transportation Plan. Information concerning current projects is obtained from MassDOT, Brockton Area Transit Authority, and/or the community responsible for the design of the project. An annual solicitation for projects commences typically in January.

As part of the TIP development, current and proposed projects are evaluated using Transportation Evaluation Criteria, and recommended to the Old Colony Metropolitan Planning Organization (MPO) for consideration and approval. Projects are evaluated using the Transportation Evaluation Criteria of Condition, Mobility, Safety and Security, Community Effects and Support, Land Use and Economic Development, and Environmental Effects. The OCPC staff uses the evaluation criteria results, as well as readiness information, available funding, and other pertinent information to develop a Draft TIP. As part of the development process, the Draft TIP is reviewed by the JTC, the OCPC, and the MPO. The Old Colony MPO then releases the Draft TIP for a 30-Day Public Review and Comment Period. Following the 30-Day Public Review and Comment Period, the Old Colony MPO considers the comments received, and then endorses the TIP.

#### 2. FAST Act and National Planning Factors

The Fixing America's Surface Transportation (FAST) Act legislation requires all MPOs to fulfill the 3C process. To meet this requirement, MPOs must perform the following activities:

- Produce the RTP, the TIP, and the UPWP.
- Establish and oversee the public-participation process.
- Maintain transportation models and data resources to support air-quality conformity determinations as well as long- and short-range planning work

The FAST Act continues to emphasize performance-based planning as an integral part of the metropolitan planning process: states are to develop performance goals, guided by the national goals, and then MPOs will work with state departments of transportation (DOTs) to develop MPO performance targets. The TIP will integrate the MPOs' performance measures and link transportation-investment decisions to progress toward achieving performance goals. The following is an overview of how the Regional Transportation Plan and the Transportation Improvement Program reflect the national planning factors.

Safety – To achieve a significant reduction in traffic fatalities and serious injuries on all public roads.
 Increase the safety of the transportation system for motorized and non-motorized users. Review safety data, goals, objectives, and strategies to promote safety.

In addition, the Strategic Highway Safety Plan should be incorporated into the long-range plan. OCPC shall apply specific criteria in the review of transportation strategies. These criteria are applied to estimated changes in safety. The primary goal of the RTP is focused on safety and security: "Enhance Safety and Security." Safety is of such importance that it is recognized in its own chapter of the RTP. Increase the security of the transportation system for motorized and non-motorized users. MPOs should look at both transit and highways networks and develop appropriate goals and strategies. Review current plans for emergency planning and security elements, identify critical facilities and transportation systems, and help define the roles of the various players in promoting security. The primary goal of the RTP is focused on safety and security: "Enhance Safety and Security." Security is of such importance that it is recognized in its own chapter of the RTP. One area of additional security planning that applies is that of traffic impacts due to extreme weather events such as impending hurricanes, and climate changes.

# Goal 1: Safety and Security: To ensure that the transportation system and its users are safe and secure.

#### **Objectives:**

- Reduce the number and rates of fatalities and serious injuries
  - Target and Performance Measure: Reduce motor vehicle, pedestrian, and bicyclist fatalities, hospitalizations, and crashes by 10 percent in 10 years
  - Target and Performance Measure: Conduct Road Safety Audits for a minimum of 3 high crash locations (MassDOT Top 5% Crash Clusters) per year, including minimum of 1 pedestrian/walkability audit and one bicycle audit per year
  - Target and Performance Measure: Fully program minimum HSIP targets each TIP year and seek to program Statewide HSIP funds when available/feasible for priority safety related projects

- Provide and maintain safe fixed route service (e.g. Preventable Accidents per 100K miles)
  - Target and Performance Measure: Maintain fixed route service preventable accidents/ 100k miles below 2 (FY 2014 actual is 1.02) (from BAT Performance Dashboard)
- Provide and maintain safe demand response service (Preventable accidents/ 100k miles)
  - Target and Performance Measure: Maintain demand response service preventable accidents/ 100k miles below 2 (FY 2014 actual is 1.20) (from BAT Performance Dashboard)
- Protect the viability of transportation infrastructure to accommodate emergency response and evacuations
- Protect transportation system users from safety and security threats
- Increase number of Safe Routes to School Partner Schools
  - Target and Performance Measure: Increase percentage of SRTS Partner Schools to 85% in 10 years. Currently, 70% of eligible partner schools are partner schools
- Infrastructure Condition (Pavement and Bridge) To maintain a highway infrastructure asset system in a state of good repair. Emphasize the preservation of the existing transportation system. The RTP supports this planning factor through this goal: Enhance and Protect Regional Mobility. The RTP also supports this performance measure: Maintaining and preserving transit, highway, and bridge infrastructure. As part of the RTP development, OCPC utilities a pavement management system to develop costs and recommended repair for operation, preservation, and maintenance of the federal aid network.

#### **Objectives:**

- Provide and maintain fixed route and demand response state of good repair
  - Target and Performance Measure: Increase miles between breakdowns with passenger interruption on fixed route to 20,000 (standard) within 10 years (currently 18,020) (from BAT Performance Dashboard)
  - Target and Performance Measure: Increase miles between breakdowns with passenger interruption on demand response to 10,000 (standard) within 10 years (currently 6,452) (from BAT Performance Dashboard)
- Improve bridge conditions
  - Target and Performance Measure: Maintain percentage of bridges categorized "structurally deficient" below 5% and increase overall average AASHTO rating (current 79) by 10 percent by 2040
- Improve pavement conditions and state of good repair
  - Target and Performance Measure: Achieve 50% of federal-aid eligible roadways in the region with a PCI-based pavement ranking of "Good" of "Excellent" within 10 years
- Congestion Reduction To achieve a significant reduction in congestion on the NHS. Enhance the integration and mobility of the transportation system, across and between modes, for people and freight. OCPC shall apply specific criteria in the review of transportation strategies. These criteria are applied to improvements in multimodal accessibility. The RTP supports these efforts through its goal: "Enhance and Protect Regional Mobility, and Foster Sustainable, Healthy, and Livable Communities."

#### **Objectives**

- Promote Mode Shift by increasing use of transit, carpool/vanpool, and non-motorized transportation modes such as bicycling and walking
  - Target and Performance Measure: Achieve 15% of commuters in the Old Colony region using healthy transportation modes (transit, walking, bicycling, etc.) within 10 years (10.5% of surveyed commuters in Old Colony Region were using transit, walking, or bicycling in the 2010 Massachusetts Travel Survey)
- Reduce traffic congestion, and improve level of service and access management
  - Target and Performance Measure: Monitor congestion levels on federal-aid eligible highway network annually, and highlight corridors with volume to capacity (v/c) ratios of 0.8 or greater for targeted study and/or improvements
- Maintain and improve transit system efficiency and capacity
  - Target and Performance Measure: Achieve average on-time ranking on fixed-route system of 98% by 2040 (from BAT Performance Dashboard)
- Increase automobile and bicycle parking capacity and usage at transit stations and commuter lots
  - Target and Performance Measure: 100% of intermodal facilities with adequate bicycle parking by 2040
- Eliminate bottlenecks on limited access highways and on the freight network
- Improve and expand human service coordination, mobility, and accessibility for all modes
- Reduce number and size of gaps in the ADA-accessible sidewalk network
- Increase use of traffic signal priority (hold current green light) for transit vehicles and traffic signal pre-emption for emergency vehicles (override programmed phasing to provide approaching emergency vehicles a green light)
- Monitor utilization and congestion levels at commuter rail and Park & Ride parking facilities
  - Target and Performance Measure: Record utilization data twice annually and report data to MassDOT
- Improve accessibility for all modes to all users
  - Target and Performance Measure: 50% of communities with Complete Streets policies within 10 years
  - Target and Performance Measure: 50% of available Transportation Improvement Program (TIP) funding allocated to projects that significantly improve bicycle and pedestrian mobility
- System Reliability To improve the efficiency of the surface transportation system. Promote efficient system operation and management. The Old Colony MPO supports Operation and Management Strategies (O and M) for both the transit and highway networks. The RTP supports this planning factor through this performance measure: "Maintaining and preserving transit, highway, and bridge infrastructure." As part of the RTP development, OCPC utilities a pavement management system to develop costs and recommended repair for operation, preservation, and maintenance of the federal aid network. Additionally, the Old Colony TIP contains operation and maintenance costs for the federal aid network and BAT.

#### **Objectives**

 Provide and maintain fixed route reliability: Miles between breakdown w/ passenger interruption

- Target and Performance Measure: Achieve average of 20K miles between breakdowns with passenger interruptions by 2025; and 25K miles by 2040 (from BAT Performance Dashboard)
- Provide and maintain demand response reliability: Miles between breakdown w/ passenger interruption
  - Target and Performance Measure: Achieve average of 10K miles between breakdowns with passenger interruptions by 2025; and 15K miles by 2040 (from BAT Performance Dashboard)
- Provide and maintain highway network travel time reliability
- Protect and strengthen transportation systems vulnerable to climate change through identification of at-risk transportation assets and development of protection measures for each category of asset
- Freight Movement and Economic Vitality To improve the nation freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development. Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency. OCPC staff shall apply specific criteria in the review of transportation strategies. These criteria are applied to changes of delay and emissions. Reduction in traffic delay has a direct consequence on economic vitality both through the timely arrival of commuters and goods and reduction in fuel expenses and losses due to air pollution. The RTP directly supports these efforts through the goal: "Promote Policies that Ensure Economic Vitality and Sustainability." OCPC directly supports regional productivity through its economic development mission manifested in the Regional Policy Plan, including support of the federally approved Old Colony Comprehensive Economic Development Strategy priority projects.

#### **Objectives**

- Reduce delay along identified freight routes
  - Target and Performance Measure: Address minimum of (2) freight corridors through UPWP every four years
- Improve safety along freight routes
- Mitigate and improve key arterial (such as Route 106) and freeway (Routes 3 and 24) bottlenecks that inhibit efficient freight movement by truck
- Identify opportunities for promoting intermodal freight movement and uses for the Brockton CSX site
- Increase access to major employment centers
  - Target and Performance Measure: Minimum of 2 planning studies in UPWP every 4 years that address access to employment centers
- Increase viaduct clearance to improve freight movement, emergency response, and reduce delay
  - Target and Performance Measure: 100% of underpasses on freight corridors have highway standard vertical clearance by 2040
- Plan and prioritize transportation investments that serve targeted development areas
- Environmental Sustainability To enhance the performance of the transportation system while protecting and enhancing the natural environment. Protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth and economic development patterns. The RTP supports this planning factor through three goals: "Promote Environmental Protection and Climate

Change Adaptation, and Pursue the GreenDOT Vision and achieve the three GreenDOT goals." The RTP and therefore the TIP includes a focus on addressing Climate Change. Where appropriate, TIP projects will include assessments of vulnerabilities and negative risks that climate change effects or extreme weather events pose, to the region's transportation infrastructure. These vulnerabilities and risks will be seriously considered when planning future improvements. Where appropriate, TIP projects should include adaptation strategies that will enable the region to implement improvements appropriately. The reduction of greenhouse gas emissions (GHG) remains an important goal in addressing climate change.

#### **Objectives**

- Minimize negative environmental impacts of the transportation system
  - Target and Performance Measure: Program a minimum of 100% of Congestion Mitigation and Air Quality (CMAQ) Program funding targets
- Reduce greenhouse gas emissions and ground level ozone (NOx and VOCs) by all transportation modes
  - Target and Performance Measure: 50% of TIP projects reduce GHGs while also reducing negative impacts on the natural environment (such as improved storm water management or the addition of green space)
- Increase the usage of clean alternative fuels and recyclable material for new transportation infrastructure
- Increase coordination of transportation and housing programs to promote affordable housing near transit
- Develop and support transportation policies that support healthy lifestyles
- Support investments that clean up brownfields and avoid investments that increase pressure to develop greenfields
- Support livable communities and smart growth development patterns through the creation of a balanced multi-modal transportation system
- Reduced project delivery delays To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies' work practices.

#### **Objectives**

- Continue to utilize transportation evaluation criteria in screening potential TIP projects
  - Target and Performance Measure: 100% of all potential projects undergo initial evaluation to determine if project is realistic, viable, and implementable
- Enhanced careening and evaluation of projects to determining Year 1 readiness for TIP
  - Target and Performance Measure: 100% of potential Year 1 TIP projects are screened for implementation readiness
  - Target and Performance Measure: At least 80% of Year 1 TIP Projects are advertised
- Continue to maintain annual participation at TIP Day with MassDOT
  - Target and Performance Measure: 100% attendance and participation at TIP Day

- Target and Performance Measure: At 25% design stage, work with stakeholders on 100% of potential projects to determine ROW, environmental permitting, and other potential challenges to project development and implementation
- Reduce time of transit contracting
- Resiliency and Reliability of the Transportation System improve the resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of surface transportation.
   Promote efficient system operation and management.

#### **Objectives**

- Provide and maintain fixed route reliability: Miles between breakdown w/ passenger interruption
  - Target and Performance Measure: Achieve average of 20K miles between breakdowns with passenger interruptions by 2025; and 25K miles by 2040 (from BAT Performance Dashboard)
- Provide and maintain demand response reliability: Miles between breakdown w/ passenger interruption
  - Target and Performance Measure: Achieve average of 10K miles between breakdowns with passenger interruptions by 2025; and 15K miles by 2040 (from BAT Performance Dashboard)
- Provide and maintain highway network travel time reliability
- Protect and strengthen transportation systems vulnerable to climate change through identification of at-risk transportation assets and development of protection measures for each category of asset

The Old Colony MPO supports Operation and Management Strategies (O and M) for both the transit and highway networks. The RTP supports this planning factor through this performance measure: "Maintaining and preserving transit, highway, and bridge infrastructure." As part of the RTP development, OCPC utilities a pavement management system to develop costs and recommended repair for operation, preservation, and maintenance of the federal aid network. Additionally, the Old Colony TIP contains operation and maintenance costs for the federal aid network and BAT.

■ Travel and Tourism – Enhance travel and tourism. The Old Colony MPO is working on efforts to enhance travel and tourism through the RTP and TIP. Opportunities to monitor, analyze, and development recommendations will be undertaken.

#### 3. Transportation Funding Programs

The major sources of TIP funding are the Federal Highway Administration (FHWA) and Federal Transit Administration (FTA). The United States Congress authorizes funding for these transportation projects through federal legislation. For highways and mass transportation, the most recent authorization was the FAST Act (2015). Federal funding received from FAST Act is allocated to different funding programs. State funds are also a key component for transportation purposes.

# **Highway Funding Programs**

 National Highway Performance Program (NHPP) provides support for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS.

- Nationally Significant Freight & Highway Projects (NSFHP) Program provides funds for small and large projects, based on project size, that meet statutory requirements. Large projects (equal to the lesser of \$100 million or a certain specified statutory percentage of the project state's FY 2015 apportionment) are eligible for a minimum award of \$25 million. Small projects, which consist of projects below the minimum large project size threshold, are eligible for a minimum award of \$5 million.
- Surface Transportation Program (STP) provides funds for roads (including NHS) that are not functionally classified as local or rural minor collectors. These roads are collectively referred to as federal-aid eligible roads. Bridge projects funded with STP funds are not restricted to federal-aid roads but may be on any public road. Transit capital projects are also eligible under this program.
- Congestion Mitigation and Air Quality Improvement Program (CMAQ) directs funds toward transportation projects in Clean Air Act non-attainment areas for ozone and carbon monoxide. These projects will contribute to meeting the attainment of national ambient air quality standards. The state receives funds based on its share of the population of air quality non-attainment areas weighted by degree of air pollution.
- Highway Safety Improvement Program (HSIP) is a program that aims to reduce the number of fatal and injury crashes by targeting high crash locations. Projects, using (HSIP) funding, are required, by MAP-21, the Federal Legislation, to be selected based a data driven process.
- Transportation Alternatives Program (TAP) MAP-21 established a new program to provide for a variety of alternative transportation projects, including many that were previously eligible activities under separately funded programs. The TAP replaces the funding from pre-MAP-21 programs including Transportation Enhancements, Recreational Trails, Safe Routes to School, and several other discretionary programs, wrapping them into a single funding source.
- **Bridge Replacement and Rehabilitation Program** provides funds for rehabilitation and replacement of any bridge on a public road. Bridges on the federal-aid system or off the federal-aid system are eligible for these funds. Eligible activities/ projects are bridge painting, seismic retrofitting, and calcium magnesium applications.
- Other Federal Aid includes projects that received federal funding outside the federal-aid program. Funds in this category are generally approved as line items appended to various pieces of federal legislation. Projects in this category are generally intended to improve public safety within a specified region that might not qualify for funding through other sources.
- Non-Federal Aid (NFA) contains all projects not receiving federal funds. Various categories of state funding are included in this group such as bikeways, State Aid (Chapter 90), MassWorks, highway construction, and maintenance.

#### **Transit Funding Programs**

- 49 U.S.C. Section 5307 provides capital, preventative maintenance, and operating assistance to transit systems in urbanized areas. MAP-21 expands eligibility for using Urbanized Area Formula funds for operating expenses. Previously, only urbanized areas with populations below 200,000 were eligible to use Federal transit funding for operating expenses. Now, transit systems in urbanized areas over 200,000 can use their formula funding for operating expenses if they operate no more than 100 buses. Activities eligible under the former Job Access and Reverse Commute (JARC) program, which focused on providing services to low-income individuals to access jobs, are now eligible under the Urbanized Area Formula program.
- 49 U.S.C. Section 5310 provides formula funding to increase the mobility of seniors and persons with disabilities. Funds are apportioned based on each State's share of the targeted populations and are now apportioned to both States (for all areas under 200,000) and large urbanized areas (over 200,000). The former New Freedom program (5317) is folded into this program.
- 49 U.S.C. Section 5311 provides capital, planning, and operating assistance to support public transportation in rural areas, defined as areas with fewer than 50,000 residents. Funding is based on a formula that uses land area, population, and transit service.
- 49 U.S.C. Section 5339 replaces the previous Section 5309 discretionary Bus and Bus Facilities
  program. This capital program provides funding to replace, rehabilitate, and purchase buses and
  related equipment, and to construct bus-related facilities.
- Mobility Assistance Program (MAP) is a state funded program similar to Section 5310, but provides capital assistance to public non-profit service carriers. MAP funds are intended for use by public agencies, such as Councils on Aging, South Shore Community Action Council, and the Brockton Area Transit Authority (BAT), to provide van service to elderly and disabled persons.

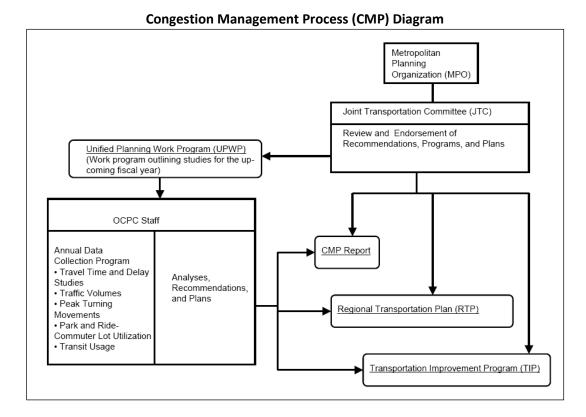

#### **Congestion Management Process (CMP)**

Congestion on a transportation facility may be defined as the level of performance that is deemed unacceptable due to traffic interference. The acceptable level of performance varies from state to state. In addition, the types of transportation modes and links also vary from place to place. Therefore, the regulations require an effective CMP that provides information on enhancing performance and identifies effective congestion reducing strategies that meet the needs of the particular region.

The CMP is, "a systematic process for managing congestion that provides information on transportation system performance and on alternative strategies for alleviating congestion and enhancing the mobility of persons and goods to levels that meet state and local needs." The CMP includes consideration of the implementation of strategies that provide the most efficient and effective use of existing and future transportation facilities. In both metropolitan and non-metropolitan areas, consideration needs to be given to strategies that reduce single occupancy vehicle (SOV) travel and improve existing transportation system efficiency. Documentation of the operational Congestion Management Process occurs during the Transportation Management Area (TMA) Certification Review conducted every four (4) years.

The figure below illustrates the integration of the Congestion Management Process within the overall planning process. This process allows for monitoring transportation systems for congestion, reviewing

and endorsing plans by local communities that make up the region, and revising monitoring of strategies and overall plans to account for a dynamic management system.

In general, the root causes of congestion may be summarized into two main categories:

- Traffic volume on a facility exceeds the available physical capacity of the facility There is a limited amount of traffic that can be moved on a roadway for a given time, or only so many transit customers that can be accommodated in a given number of buses or trains. This is considered the physical capacity of the system. Bottlenecks occur at locations where the physical capacity is restricted, with flows from upstream sections (with higher capacities) being funneled into smaller downstream segments. When traffic flow breaks down to stop-and-go conditions, capacity is actually reduced. Bottlenecks can be very specific chokepoints in the system, such as a poorly functioning freeway-to-freeway interchange, or an entire highway corridor where a "system" of bottlenecks exists, such as a closely spaced series of interchanges with local streets. Physical capacity can be reduced by the addition of "intentional" bottlenecks, such as traffic signals and tollbooths. Bottlenecks can also exist on long upgrades and can be created by "surges" in traffic, as experienced around resort areas, or due to specific events (sports events, parades, etc.).
- Traffic Incidents In addition to the physical capacity, external events can have a major effect on traffic flow. These include traffic incidents such as crashes and vehicle breakdowns; work zones; inclement weather; special events; and poorly timed traffic signals. When these events occur, their main impact is to subtract physical capacity from the roadway. Events also may cause changes in traffic demand by causing travelers to rethink their trips (e.g., snow and other types of severe weather). The level of congestion on a roadway is determined by the interaction of physical capacity with events that are taking place at a given time. The effect of a traffic

incident depends on how much physical capacity is present. Consider a traffic crash that blocks a single lane on a freeway. That incident has a much greater impact on traffic flow if only two normal lanes of travel are present than if three lanes are present. Therefore, strategies that improve the physical capacity of bottlenecks also lessen the impacts of roadway events such as traffic incidents, weather, and work zones.

Specific issues that contribute to congestion include:

- Absence of incident management plan
- Adjacent land use development inconsistent with the transportation system
- Bottlenecks due to too many trips occurring within a narrow time frame
- Crashes
- Driver behavior/distractions
- Extreme weather events
- Inadequate acceleration/deceleration lanes
- Interchange spacing too short on limited access highways
- Lack of adequate roadway, transit, and or parking capacity
- Lack of signal coordination
- Low automobile occupancy
- Poor access control on arterials
- Poor signal timing
- Special events/other
- Work zones

The cost of congestion can be measured in dollars as well as time. There is a direct link between transportation investment, travel conditions (congestion and reliability), and economic productivity. Two key trends have a substantial impact on the total cost of moving freight:

- As congestion extends into the midday, which is typically the peak travel period for trucks, costs that are more direct will be incurred.
- Reliability For trucks, the ability to secure delivery windows predictably will decrease and will add even more costs as firms struggle to optimize delivery schedules. This is especially a problem for truckers who must meet "just-in-time" delivery schedules set by shippers, manufacturers, and retailers.

The CMP is also designed to identify intersections and road segments that demonstrate congestion, excessive delays, and circulation problems. The CMP identifies these congested facilities through studies completed by OCPC and other agencies and organizations, and through the ongoing monitoring of facilities. Standard operating procedures have been adopted for data collection that allows the monitoring of intersections within the region specifically targeted due to congestion. The CMP identifies numerous congested intersections, based on a threshold of LOS "D" or less, within the Old Colony region.

In addition to the intersection locations, there are a number of community centers in the region including, Bridgewater Center (Central Square), East Bridgewater Center, Downtown Brockton, Stoughton Center, and West Bridgewater Center, that experience chronic congestion and circulation problems requiring on-going efforts to improve traffic flow and reduce delays.

#### 4. Public Participation, Coordination, and Consultation

Transportation planning is one component of the 3C Continuing, Cooperative, and Comprehensive planning process that includes land use/growth management, housing, open space and recreation, economic development, historic preservation, and water quality. It is important that these potentially conflicting elements be consistent with one another in order to facilitate the efficient movement of people and goods in the region. The first step in obtaining consistency is the coordination, and consultation with appropriate agencies and groups on exiting projects. Each of the functional planning areas uses common land use, population and employment statistics, and forecasts.

An underlying principle of the metropolitan planning process is public participation, coordination, and consultation with agencies and groups. As such, a successful public participation model was developed and utilized. Legal advertisements are not a panacea for public participation. With that in mind, the staff engaged the public to the maximum extent possible. Various strategies were deployed, documented, and evaluated.

This FFY 2017-2021 Transportation Improvement Program was developed in accordance with the Public Participation Plan (PPP) for the Old Colony Region. Brockton Area Transit utilizes the Old Colony MPO's public participation as its public participation process. The public discussion of the Transportation Improvement Program (TIP) at Old Colony JTC, Old Colony MPO, and transportation meetings satisfies the Program of Projects (POP) public hearing requirements of the Federal Transit Administration (FTA).

Public participation in the TIP development process is welcomed and encouraged. The public is able to participate in the development of the TIP by attending meetings and reviews designated for the TIP, or by contacting the OCPC offices. To ensure that there is equity in the distribution of transportation resources and that there is reasonable access to the planning process, OCPC will continually conduct Title VI and Environmental Justice planning for the Old Colony Region.

Staff utilized a diverse methodology for coordination, consultation, and engaging the public to the maximum extent possible in the development of the TIP. The methodology is presented below.

- Old Colony Metropolitan Planning Organization (MPO) The MPO provided oversight of the TIP development and has the responsibility of ultimately endorsing the TIP. Meetings typically take place on the third Tuesday of the month.
- Old Colony Planning Council (OCPC) The Old Colony Planning Council discusses the TIP development and provides both planning and policy guidance at regularly scheduled Council meetings. Meetings take place typically during the last Wednesday of the month.
- Old Colony Joint Transportation Committee (JTC) Functioning as the advisory group to the Old Colony MPO and Old Colony Planning Council, this group assists with the identification of transportation deficiencies and provides regular input and review of TIP products. The Committee consists of superintendents and or directors of highway department of public works, town planners, engineers, etc. Typically, meetings take place during the second Thursday of the month.
- Transit Providers Council staff solicits input regarding transit issues from the Brockton Area Transit Regional Transit Authority (BAT), Greater Attleboro-Taunton Regional Transit Authority (GATRA), MBTA, and, the South Shore Community Action Council.

- Coordination and consultation activities Coordination and consultation, and/ or information dissemination activities take place with multiple agencies and groups. As such, these coordination and consultation activities routinely could take place with: Brockton Area Transit, Brockton 21<sup>st</sup> Century Cooperation, Cape Verdean Association of Brockton, Chief Elected Officials, Departments of Public Works and Highway Departments, Massachusetts Department of Transportation, Latino Health Institute, Greater Attleboro Taunton Transit Authority, Massachusetts Department of Transportation District 5, MBTA, Metro South Chamber of Commerce, NAACP, Plymouth and Brockton (P&B), Plymouth Area Chamber of Commerce, Plymouth County Development Council, South Shore Chamber of Commerce, and South Shore Community Action Council.
- Transportation Advisory Network (TAN) The TAN Outreach Contact List consists of over 200 members. Members include chief elected officials, legislators, planning boards, Massachusetts Department of Transportation, Federal Highway Administration (FHWA), Federal Transit Administration (FTA), transit providers, minority groups, town clerks, and transportation officials. The objective is to provide continuing outreach to a wide network. Council staff provides announcements of product availability, upcoming events, and meetings associated with the TIP to the TAN. The TAN Outreach Contact List is shared with MassDOT-Office of Transportation Planning, and MassDOT-Office of Diversity and Civil Rights.
- Media Outlets and places of public convenience Staff utilizes multiple media outlets and places of public convenience to solicit public comment, advertise meetings, and advertise TIP availability. The media outlets and places of public convenience consisted of newspaper legal advertisements (Brockton Enterprise, Ojornal, and Patriot Ledger), websites, town and city halls, local cable access, etc.
- Copies of the Draft TIP are posted on the OCPC website and are available in the Council's Office, so that reasonable access and opportunities to review the Draft TIP are provided. Copies of the Draft TIP are provided upon request.
- 30-Day Public Review Period During the public review period for the Draft TIP, copies are available and their availability was advertised using multiple media outlets and the TAN. During the period, public meetings were held and the Council staff was available to discuss the Draft TIP with the public upon request.

The Brockton Area Transit Authority, the FTA Section 5307(c) applicant, has consulted with the Old Colony Metropolitan Planning Organization (MPO) and concurs that the public involvement process adopted by the MPO for development of the TIP satisfies the public hearing requirements that pertain to the development of the Program of Projects (POP) for the regular Section 5307, Urbanized Area Formula Program, grant applications including the provisions for public notice and the time established for public review and comment. The public discussion of the Transportation Improvement Program (TIP) at Old Colony JTC, Old Colony MPO, and transportation meetings satisfies the Program of Projects (POP) public hearing requirements of the Federal Transit Administration (FTA).

#### **Environmental Justice**

Environmental Justice is an important part of the planning process and is considered in all phases of planning. A truly integrated and effective planning process actively considers and promotes

environmental justice within projects and groups of projects, across the total plan, and in policy decisions. All reasonably foreseeable adverse social, economic, and environmental effects on minority populations and low-income populations must be identified and addressed. There are three fundamental Environmental Justice principles:

- To avoid, minimize, or mitigate disproportionately high and adverse human health or environmental effects, including social and economic effects, on minority populations and lowincome populations.
- To ensure the full and fair participation by all potentially affected communities in the transportation decision-making process.
- To prevent the denial of, reduction in, or significant delay in the receipt of benefits by minority populations and low-income populations.

Public involvement is an integral part of transportation planning and project development decision-making. The U.S. DOT Order (5610.2) on Environmental Justice directs the provision for minority populations and low-income populations greater access to information on and opportunities for public participation in matters that may affect human health and the environment.

Effective public involvement in the planning process and the project-development process can alert State and local agencies about environmental justice concerns so that they do not result in surprises during the project-development stage. Continuous interaction between community members and transportation professionals is critical to successfully identify and resolve potential Environmental Justice concerns.

The staff has public-involvement procedures established that provide for consideration of Environmental Justice. These procedures provide an inclusive, representative, and equal opportunity for two-way communication resulting in appropriate action that reflects this public involvement. Environmental Justice is considered in all aspects of planning and project decision-making, including the design of both the public-involvement plan and the proposed facility.

Environmental Justice Analysis asks whether a proposed action or plan causes disproportionately high and adverse effects on minority populations and low-income populations, and whether these populations are denied benefits. A framework of analysis that can determine how a proposed action or plan could differentially affect different populations is important. As such, an analysis of benefits and burdens is utilized. In addition, computer mapping of Environmental Justice Areas along with past, present and future projects funded through the transportation improvement program, available transit services and their associated walking times, commuter parking facilities, pavement conditions, high crash locations, areas of congestion is utilized to measure the distribution of funding (to ensure geographic equity), to determine priorities areas of need/ and or concern.

Examinations of potential benefits and burdens because of the implementation of the TIP were conducted. Examples of benefits considered were mobility, accessibility, infrastructure condition, environment, reliability, safety, security, load factors, efficiency, and consultation with riders in improving bus services to the transit-dependent. While examples of burdens considered were: air, noise, and water pollution and soil contamination, destruction or disruption of community cohesion or a community's economic vitality, destruction or disruption of the availability of public and private facilities and services, adverse employment effects, displacement of persons, businesses, farms, or nonprofit organizations, increased traffic congestion, isolation, exclusion, or separation of minority or low-income

individuals within a given community or from the broader community, and the denial of, reduction in, or significant delay in the receipt of, benefits of programs, policies, or activities.

An assessment of the benefits and burdens of the Transportation Improvement Program (TIP) was completed to identify all regionally significant projects constructed and/ or programmed in the Old Colony Transportation Improvement Program during the period of 2004 – 2021. Constructed projects funded through the TIP were included to provide a benchmark of investments. The constructed projects were compiled and then the staff analyzed the location of these improvements relative to locations of minority and low-income populations. For the purposes of identifying these populations, the staff utilized the MassGIS Environmental Justice GIS Shape file. Polygons in the Environmental Justice (EJ) Populations layer represent neighborhoods across the state with high minority, non-English speaking, low-income, and foreign-born populations.

Regionally, it was determined that about 33.3 percent of the identified improvement projects, representing approximately 25.7 percent of the identified investment dollars on the FFY 2017-2021 TIP are located in or immediately adjacent to EJ communities. This percentage is close to the 27.9 percent of the region's population identified as living in EJ communities. Non-mappable projects, such as transit vehicle replacements or rehabilitations, bridge and roadway repair line items for future projects to be defined, and other non-location-specific projects are not included in this analysis. Moreover, many of the projects that are not located directly within an EJ community are projects of key regional significance, such as interstate highway improvements. These improvements benefit the region as a whole, and provide access to many key employment centers, including downtown Brockton and regional shopping centers.

#### Investment Value of TIP Projects 2017-2021 (Projects Planned)

Туре	Population Represented in EJ Communities (2010)	Percent Population Represented	TIP Project Investment	Percent Projects in EJ/ Non EJ Communities by Total Investment (\$)
Within EJ Communities	101,053	27.9%	\$15,454,246	25.7%
Outside EJ Communities	261,353	72.1%	\$44,741,036	74.3%
Totals	362,406	100.0%	\$53,890,700	100%

OCPC undertook further analysis to determine the level of investments during the period of 2004-2016 through <u>previous</u> Transportation Improvement Programs. From that analysis, it was concluded that about 48.3 percent of the identified improvement projects, representing approximately 50.8 percent of the identified investment dollars allocated during the TIP years of 2004-2016 are located in or immediately adjacent to EJ communities. This exceeds the 27.9 percent of the region's population identified as living in EJ communities.

# Investment Value of TIP Projects 2004 - 2016 (Projects Implemented)

	Population Represented in EJ Communities	Percent Population	TIP Project	Percent Projects in EJ/ Non EJ Communities by Total Investment
Туре	(2010)	Represented	Investment	(\$)
Within EJ Communities	101,053	27.9%	\$83,063,234	50.8%
Outside EJ Communities	261,353	72.1%	\$80,403,726	49.2%
Totals	362,406	100.0%	\$163,466,960	100%

From the examination of benefits and burdens, it is the determination that no projects implemented because of the TIP will result in adverse impacts to the Environmental Justice Areas in the Old Colony region.

As such, from the review, it may be concluded from the public investment and involvement in the regional transportation planning process and the resultant FFY 2017-2021 Transportation Improvement Program and previous TIPs (dating back to 2004) demonstrate that the benefits of the regional transportation planning process are afforded equitably to both EJ and Non-EJ communities. Given this equitable distribution and investment, it is finding of the Old Colony Planning Council that the Lowincome and minority populations are not disproportionately impacted and are beneficiaries of the transportation planning process and project implementation in the Old Colony Region.

As such, the Old Colony Planning Council continues to work with our regional partners in the advancement of environmental justice principles throughout the regional planning process. Such analyses will be conducted annually and included in the endorsed TIP.

#### HIGHWAY AND BRIDGE PROJECT LISTING BY COMMUNITY

#### 1. Prioritization and Transportation Evaluation Criteria (TEC)

Several factors are considered when developing the prioritization and programming of TIP projects.

- Financial feasibility of project
- Level of impact of the project (ADTs, Location, NHS, Safety)
- Local and regional support for the project
- Need for project to be implemented (safety, congestion, etc.)
- Project has been derived from the Management Systems (Congestion, Land Use, Safety, and Pavement)
- Project has Project Review Committee (PRC) approval and/or a MassDOT ID
- Project must have reasonable progress in design, as to assure that the project can be implemented in the active year
- Project Readiness
- Results of Annual TIP Day
- Results of Evaluations Derived from Application of Transportation Evaluation Criteria (TEC)

#### **Transportation Evaluation Criteria (TEC)**

With transparency and reasonableness in mind, in 2004, the Old Colony MPO began utilizing TIP project transportation evaluation criteria to inform the process of evaluating and selecting projects for programming in the TIP. The evaluation criteria are a means of programming projects that will help the region attain the visions established by the Old Colony MPO, which include, to maintain a state of good repair, focus investments on existing activity centers, improve mobility for people and freight, reduce the level of greenhouse gas (GHG) emissions, minimize environmental burdens from transportation facilities on low-income and minority populations, and provide safe transportation for all modes. Projects with components and outcomes that help attain the goals of the Old Colony MPO receive higher scores.

The Old Colony MPO staff typically utilizes a Functional Design Report or Corridor Study to conduct a complete evaluation. The transportation evaluation criteria forms are included in Appendix H.

#### **Evaluation of Projects**

The evaluation results of projects being considered for the federal fiscal years (FFYs) 2017-2021 Transportation Improvement Program are included in the appendices. The scoring results of the Transportation Evaluation Criteria are included with the applicable projects listed in the Universe of Projects beginning on Page 18.

The TIP projects are evaluated and are scored in six of the seven criteria categories: (Condition, Mobility, Safety, Community Effects and support, Land Use and Economic Development, and Environmental Effects) on a scale of +3 to -3.

In general, this step scores the <u>impact</u> the evaluated project will have on each of the six criteria. The proposed rating scale is as follows:

- A score of +3 is highly beneficial,
- A score of zero is neutral or not applicable,
- A score of –3 is highly detrimental.

If there is no impact or the impact is mitigated so that there is no effect, the score is zero or not applicable. The score for each category should be the average of all of the individual criteria in each category.

The cost effectiveness category is not scored in order to mitigate concerns regarding equity among urban, suburban, and rural projects, but that the cost effectiveness ratios be calculated and shown for information purposes.

The category scores for a project are then combined into an overall score of between +18 and -18. Once the projects are scored, projects may be grouped by assigning each project, based on its score, to projects categories by range, to avoid false precision. For example, projects with scores of +15 to +18 may be deemed excellent, +10 to +14 very good, etc.

The staff uses evaluation ratings and project readiness information to prepare a First-Tier List of Projects. This is a list of the projects with the highest ratings that could be made ready for advertising

within the TIP's time horizon (next four federal fiscal years). The staff relies on the MassDOT Highway Division to provide information about what year a project would be ready for advertising. In developing the recommendation for the draft TIP, the staff strongly considers the First-Tier List of Projects. The Old Colony MPO staff also factors in projects that are listed in the regional transportation plan in order to implement the RTP, considers geographic equity to help ensure that the list of projects addresses needs throughout the region, and accounts for cost to comply with fiscal constraint.

## 2. Universe of Projects and Geographic Distribution of Projects

The following is an informational list of identified projects regardless of priority and funding source. The projects listed are ranked, from high to low, by the Transportation Evaluation Criteria (TEC) Score. Program Year refers to which year the project is programmed or located if not programmed. The results of scoring results of the application of Transportation

PROJECT LOCATION AND DESCRIPTION	PROJECT ID#	PROGRAM YEAR	TEC
BROCKTON - CORRIDOR IMPROVEMENTS ON ROUTE 123 (BELMONT STREET), FROM ANGUS BEATON DRIVE TO WEST STREET	608088	2019	10.80
BROCKTON - FOREST AVENUE CORRIDOR (MAIN STREET TO BELMONT STREET)	PRE - PRC	NOT PROGRAMMED	10.12
WEST BRIDGEWATER - RECONSTRUCTION ON ROUTE 106, FROM ROUTE 28 (CENTRAL SQUARE) TO EASTON T.L.	603456	NOT PROGRAMMED	9.55
STOUGHTON- CORRIDOR IMPROVEMENTS ON ROUTE 138 FROM LINCOLN STREET TO CENTRAL STREET, INCLUDING INTERSECTION IMPROVEMENTS ROUTE 138 (WASHINGTON STREET) & CENTRAL STREET	607403	2021	9.32
WHITMAN - TRAFFIC SIGNAL IMPROVEMENTS & RELATED WORK ON BEDFORD STREET (ROUTE 18) AT 2 LOCATIONS: AUBURN STREET (ROUTE 14) & TEMPLE STREET (ROUTE 27)	607860	2018	9.25
BROCKTON- IMPROVEMENTS AND RELATED WORK ON CRESCENT STREET (ROUTE 27), INCLUDING REPLACEMENT OF GROVE STREET BRIDGE, B-25-005, OVER SALISBURY PLAIN RIVER	607818	NOT PROGRAMMED	9.07
KINGSTON - RECONSTRUCTION ON ROUTE 106 (MAIN STREET, WAPPING ROAD)	601164	NOT PROGRAMMED	9.00
BROCKTON- INTERSECTION IMPROVEMENTS @ CRESCENT STREET (ROUTE 27)/QUINCY STREET/MASSASOIT BOULEVARD	606143	2021	8.25
AVON - INTERSECTION IMPROVEMENTS AT HARRISON BOULEVARD AND POND STREET	608086	2019	8.20
BROCKTON - DOWNTOWN BROCKTON TWO-WAY TRAFFIC CIRCULATION	PRE - PRC	NOT PROGRAMMED	8.20
STOUGHTON - CENTRAL STREET & PEARL STREET INTERSECTION IMPROVEMENTS	PRE - PRC	NOT PROGRAMMED	8.20
ABINGTON/ BROCKTON - NORTH QUINCY STREET, CHESTNUT STREET, AND BOUNDARY AVENUE SIGNALIZATION AND GEOMETRIC IMPROVEMENTS	608143	2019	8.05
STOUGHTON - CANTON STREET (ROUTE 27) & SCHOOL STREET SIGNALIZATION AND GEOMETRIC IMPROVEMENTS	PRE - PRC	NOT PROGRAMMED	8.04

PLYMOUTH - RECONSTRUCTION OF TAYLOR AVENUE, FROM WHITE HORSE ROAD TO MANOMET POINT ROAD, INCLUDES P-13-010	605038	2017	8.00
BROCKTON - PERKINS AVENUE RESURFACING & RELATED WORK FROM SUMMER STREET TO MAIN STREET	601642	NOT PROGRAMMED	8.00
PLYMOUTH - IMPROVEMENTS ON OBERY STREET, FROM SOUTH STREET TO A.C. CARANCI WAY/PLYMOUTH NORTH H.S. DRIVE INTERSECTION	606264	2018	7.97
EASTON - ROUTE 138 @ UNION STREET SIGNALIZATION AND GEOMETRIC IMPROVEMENTS	607438	2018	7.85
STOUGHTON - CENTRAL STREET AT CANTON STREET AND TOSCA DRIVE (ROUTE 27) SIGNALIZATION AND GEOMETRIC IMPROVEMENTS	PRE - PRC	NOT PROGRAMMED	7.78
EASTON - ROUTE 138 & ELM STREET INTERSECTION SIGNALIZATION AND GEOMETRIC IMPROVEMENTS	608195	NOT PROGRAMMED	7.72
PLYMOUTH - WATER STREET RECONSTRUCTION (SOUTH PARK AVENUE TO ROUTE 3A)	PRE - PRC	NOT PROGRAMMED	7.67
ABINGTON - SAFE ROUTES TO SCHOOL (CENTER SCHOOL)	605693	NOT PROGRAMMED	7.55
ABINGTON - HANCOCK STREET & CHESTNUT STREET SIGNALIZATION AND GEOMETRIC IMPROVEMENTS	PRE - PRC	NOT PROGRAMMED	7.39
EAST BRIDGEWATER - RESURFACING AND SIDEWALK CONSTRUCTION ON BEDFORD STREET (ROUTE 18), FROM WHITMAN STREET (ROUTE 106) TO CENTRAL STREET	607941	2019	7.14
PLYMOUTH - RESURFACING & RELATED WORK ON ROUTE 3	606524	NOT PROGRAMMED	7.05
STOUGHTON - WASHINGTON STREET (ROUTE 138) & YORK STREET SIGNALIZATION AND GEOMETRIC IMPROVEMENTS	PRE - PRC	NOT PROGRAMMED	7.05
EASTON - ROUTE 123 (DEPOT STREET) RECONSTRUCTION ON FROM NEWELL CIRCLE TO ROUTE 138	607217	2020	7.00
STOUGHTON - RECONSTRUCTION OF TURNPIKE STREET	607214	NOT PROGRAMMED	7.00
DUXBURY - SIGNAL INSTALLATION @ ROUTE 3 (NB & SB) RAMPS & ROUTE 3A (TREMONT STREET)	606002	NOT PROGRAMMED	6.88
HANSON - MAQUAN STREET (ROUTE 14) FROM INDIAN HEAD STREET TO THE PEMBROKE TOWN LINE ROADWAY IMPROVEMENTS	PRE - PRC	NOT PROGRAMMED	6.88
PEMBROKE- RESURFACING AND RELATED WORK ON ROUTE 53	608266	NOT PROGRAMMED	6.88
HANOVER- RESURFACING & RELATED WORK ROUTE 53	607715	TBD	6.88
PEMBROKE - ROUTE 53 AT PLEASANT STREET SIGNALIZATION AND GEOMETRIC IMPROVEMENTS	607337	2018	6.85
EASTON - ROUTE 138 & TURNPIKE STREET INTERSECTION SIGNALIZATION AND GEOMETRIC IMPROVEMENTS	604098	NOT PROGRAMMED	6.45
MIDDLEBORO- PLYMOUTH- RESURFACING & RELATED WORK ON ROUTE 44	607568	TBD	6.45

ABINGTON- SUPERSTRUCTURE REPLACEMENT & SUBSTRUCTURE REHABILITATION, A-01-006, CENTRAL STREET OVER SHUMATUSCACANT RIVER	607346	TBD	
BROCKTON- SUPERSTRUCTURE REPLACEMENT, B-25-047, ROUTE 24 OVER WEST CHESTNUT STREET	607266	TBD	

BROCKTON- WEST BRIDGEWATER- BRIDGEWATER- RAYNHAM- TAUNTON- FREETOWN- CLEANING, PAINTING & REPAIRING 11 STEEL BRIDGES ON/OVER ROUTE 24	606021	TBD	
DUXBURY- BRIDGE REPLACEMENT, D-14-010 (48H & 48J), ROUTE 3 (PILGRIM HIGHWAY) NB/SB OVER FRANKLIN STREET	605294	TBD	
HINGHAM- HANOVER- DUXBURY- KINGSTON- PLYMOUTH- CLEANING, PAINTING & REPAIRING 7 STEEL BRIDGES ON/OVER ROUTE 3	606023	TBD	
KINGSTON- SUPERSTRUCTURE REPLACEMENT, K-01-011, PILGRIM HIGHWAY (ROUTE 3) OVER JONES RIVER	607268	TBD	
NORWELL- PEMBROKE- BRIDGE REPLACEMENT, N-24-004=P-05-008, ROUTE 3 (NB & SB) OVER NORTH RIVER	607349	TBD	

# **Geographic Distribution of Projects**

The Old Colony Planning Council staff monitors the geographic distribution of TIP projects over time. Table 1 provides the distribution of TIP projects from 2012 through 2021. To assist with providing context to the distribution, included in the table is 2010 Population and 2010-2014 Median Household Income.

From an examination of the distribution of TIP projects from 2012 through 2021, the following observations may be made:

- There are higher concentrations of projects within the more populated urban areas (i.e. Brockton at 34.6 percent of all projects). Such concentrations tend to follow areas with elevated levels of congestion and crash clusters.
- The towns of Easton (15.4%) and Pembroke (11.5%) also had higher concentration of projects. A potential explanation for such a trend is that these populous communities feature proximity to limited access highways, commuter rail, and academic institutions of higher learning. Such features, while beneficial in many respects, also lead to higher pedestrian, bicyclist and vehicle trips, and the need for additional multimodal and infrastructure.

Table 1 - Geographic Distribution of Projects

Community	2010 Population	Median Household Income, 2010-2014	Number of TIP Projects, 2012 through 2021		
Abington	15,985	\$81,500	1	\$2,080,416	3.8%
Avon	4,356	\$78,750	2	\$5,905,120	7.7%

Abington and Brockton - North Quincy Street at Chestnut Streetand Boundary Avenue

#### **TIP - FEDERAL REQUIREMENTS AND PROJECT LISTS**

1. Endorsements of the FFY 2017-2021 Old Colony TIP, Self-Compliance Statements of the Comprehensive, Continuing, Cooperative Transportation Planning Process, and Self Compliance Statements of the 310 CMR 60.05: Global Warming Solutions Act Requirements for the Transportation Sector and the Massachusetts Department of Transportation

The currently endorsed Unified Planning Work Program, Regional Transportation Plan, and Transportation Improvement Program, together with any amendments, were developed in accordance with FHWA/ FTA regulations governing the implementation of the Moving Ahead for Progress in the 21<sup>st</sup> Century (MAP-21), the Fixing America's Surface Transportation Act (FAST Act), and EPA regulations governing, the implementation of the Clean Air Act Amendments of 1990, and fully incorporate the applicable requirements of the 1964 Civil Rights Act and the Americans with Disabilities Act of 1990. From certification reviews conducted in 2006 and 2011, the FHWA and FTA have determined that the transportation planning process of the MPO substantially meets the requirements of the Metropolitan Planning Rule 23 CFR Part 450 Subpart C and 49 CFR Part 613. In addition, FHWA and FTA have jointly certified the transportation planning process.

Endorsement of FFY 2017-2021 Old Colony TIP is located in Appendix A.

Self-Compliance Statements of the Comprehensive, Continuing, Cooperative Transportation Planning Process is located in Appendix B.

<sup>\*\*</sup>Does not include Bridge Projects

Self-Compliance Statements of the 310 CMR 60.05: Global Warming Solutions Act Requirements for the Transportation Sector and the Massachusetts Department of Transportation is located in Appendix C.

#### 2. Procedures for Amendments and Administrative Modifications

Transportation Improvement Programs, no matter how well planned, may need to be changed from their original MPO endorsed form. There are different actions that may be taken in order to change the endorsed TIP. These actions vary, depending on the extent of the change, and have different impacts on the TIP.

The procedures for changing the TIP are:

#### **TIP Amendment**

A TIP Amendment is the most extensive change procedure that a TIP may undergo. A TIP Amendment requires the proposed changes to undergo a thirty-day public review period and be formally endorsed by the MPO. However, the Old Colony MPO, at their discretion, may vote to abbreviate the public comment period under what they consider extraordinary circumstances beyond the MPO's control.

TIP Amendments are prompted by:

- ✓ Significant funding changes in a project
- ✓ A project that is not programmed on the TIP is requested to be put on the TIP. (Moving a project back from the previous TIP to the current TIP is an exception see below)

#### **TIP Adjustment/ Administrative Modification**

A TIP Adjustment/ Administrative Modification is a minor Amendment. The Adjustment procedure generally requires an administrative action (the change), Joint Transportation Committee advice, and MPO signatory notification of the change. Adjustments or Administrative Modifications to the TIP are minor amendments such as adding projects to the Illustrative Project Listing, and the procedure requires an administrative action (the change), JTC advice, and Old Colony MPO notification of the change.

TIP Adjustments are prompted by:

- ✓ A project currently on the TIP is moved into the active year element (FFY 2017), including Mega projects as long as the TIP remains financially constrained
- ✓ A modest funding change
- ✓ A project is split into one or more projects
- ✓ A project listed in the FFY 2016-2019 TIP, and is not advertised in FFY 2016 is moved into the FFY 2017-2021 TIP.

#### 3. Financial Summary and Targets

The Massachusetts Department of Transportation Office of Transportation Planning, in consultation with the Regional Planning Agencies, provides each region with yearly-targeted federal funding levels with state match for highway and bridge projects, and separate yearly targets for projects that qualify for Congestion Mitigation Air Quality (CMAQ) funds, Highway Safety Improvement Program (HSIP) funds, and Transportation Alternative Program (TAP) funds. The State and Regional Funding Targets are located in Appendix I. The anticipated revenue from MassDOT is summarized below, in the summary of regional funding categories on page 26, and on each year of project programming (2017- Page 27, 2018 - Page 28, 2019 - Page 29, 2020 – Page 30, and 2021 - Page 31).

**Highway Projects** 

Fiscal Year	/	Anticipated	Total of Regional			
		Revenues	Pro	jects Programmed		
	(Re	gional Targets,				
	Sta	tewide Funds,				
	and	Bridge Funds)				
2017	\$	12,507,609	\$	11,872,392		
2018	\$	9,829,235	\$	7,830,911		
2019	\$	16,200,537	\$	14,861,232		
2020	\$	10,062,013	\$	8,182,717		
2021	\$	22,850,433	\$	21,997,358		
Totals	\$	71,449,827	\$	64,744,610		

Programmed amount includes projects funded with regional target funds (CMAQ, HSIP. TAP, STP) and statewide funds (FFYs 2017 and 2019)

**Transit Projects** 

Fiscal Year	1	ederal, State, d Local Funds	7	Total Programmed
2017	\$	10,456,000	\$	10,456,000
2018	\$	13,841,000	\$	13,841,000
2019	\$	14,710,634	\$	14,710,634
2020	\$	9,130,000	\$	9,130,000
2021	\$	7,610,000	\$	7,610,000
Totals	\$	55,747,634	\$	55,747,634

Programmed amount include MAP and State Funds

The Transportation Improvement Program is financially constrained according to the definition in the Federal Register 23 CFR Part 450.324. Please note that project costs programmed in the TIP are expressed in Year of Expenditure (YOE) dollars. The cost inflation factor utilized is increased 4% annually (e.g. 2018 at 4%; 2019 at 8%; 2020 at 12%, and, 2021 at 16%). The projects programmed do not exceed the funding estimates of federal and state funds available in each of these fiscal years.

The financial plan contained herein is financially constrained, and reflects the highway program emphasis on the maintenance and operation of the current roadway and bridge system with the ability to provide for additional capital improvements. A fiscal constraint analysis is included on each of the highway program programming tables.

Only projects for which funds can be expected have been included.

# 4. Summary of Regional Funding Categories (FFY 2017-2021)

701 CMR 7.00 Use of Road Flaggers and Police Details on Public Works Projects / 701 CMR 7.00 (the Regulation) was promulgated and became law on October 3, 2008. Under this Regulation, the CMR is applicable to any Public works Project that is performed within the limits of, or that impact traffic on, any Public Road. The Municipal Limitation referenced in this Regulation is applicable only to projects where the Municipality is the Awarding Authority. For all projects contained in the TIP, the Commonwealth is the Awarding Authority. Therefore, all projects must be considered and implemented in accordance with 701 CMR 7.00, and the Road Flagger and Police Detail Guidelines. By placing a project on the TIP, the Municipality acknowledges that 701 CMR 7.00 is applicable to its project and design and construction will be fully compliant with this Regulation. This information, and additional information relative to guidance and implementation of the Regulation can be found at the following link on the MassDOT Highway/Dission website: http://www.massdot.state.ma.us/Highway/Baggers/main.aspx

701 CMR 7.00 Use of Road Flaggers and Police Details on Public Works Projects / 701 CMR 7.00 (the Regulation) was promulgated and became law on October 3, 2008. Under this Regulation, the CMR is applicable to any Public works Project that is performed within the limits of, or that impact traffic on, any Public Road. The Municipal Limitation referenced in this Regulation is applicable only to projects where the Municipality is the Awarding Authority. For all projects contained in the TIP, the Commonwealth is the Awarding Authority. Therefore, all projects must be considered and implemented in accordance with 701 CMR 7.00, and the Road Flagger and Police Detail Guidelines. By placing a project on the TIP, the Municipality acknowledges that 701 CMR 7.00 is applicable to its project and design and construction will be fully compliant with this Regulation. This information, and additional information relative to guidance and implementation of the Regulation can be found at the following link on the MassOD Highway Division website: http://www.massod.tstate.ma.us/Highway/flaggers/main.aspx

701 CMR 7.00 Use of Road Flaggers and Police Details on Public Works Projects / 701 CMR 7.00 (the Regulation) was promulgated and became law on October 3, 2008. Under this Regulation, the CMR is applicable to any Public works Project that is performed within the limits of, or that impact traffic on, any Public Road. The Municipal Limitation referenced in this Regulation is applicable only to projects where the Municipality is the Awarding Authority. For all projects contained in the TIP, the Commonwealth is the Awarding Authority. Therefore, all projects must be considered and implemented in accordance with 701 CMR 7.00, and the Road Flagger and Police Detail Guidelines. By placing a project on the TIP, the Municipality acknowledges that 701 CMR 7.00 is applicable to its project and design and construction will be fully compliant with this Regulation. This information, and additional information relative to guidance and implementation of the Regulation can be found at the flowing link on the Massic/Dr Highway/Division website: http://www.massdot.state.ma.us/Highway/flaggers/main.aspx

701 CMR 7.00 Use of Road Flaggers and Police Details on Public Works Projects / 701 CMR 7.00 (the Regulation) was promulgated and became law on October 3, 2008. Under this Regulation, the CMR is applicable to any Public works Project that is performed within the limits of, or that impact traffic on, any Public Road. The Municipal Limitation referenced in this Regulation is applicable only to projects where the Municipality is the Awarding Authority. For all projects contained in the TIP, the Commonwealth is the Awarding Authority. Therefore, all projects must be considered and implemented in accordance with 701 CMR 7.00, and the Road Flagger and Police Detail Guidelines. By placing a project on the TIP, the Municipality acknowledges that 701 CMR 7.00 is applicable to its project and design and construction will be fully compliant with this Regulation. This information, and additional information relative to guidance and implementation of the Regulation can be found at the following link on the MassDOT Highway Division website: http://www.massdot.state.ma.us/Highway/flaggers/main.aspx

701 CMR 7.00 Use of Road Flaggers and Police Details on Public Works Projects (701 CMR 7.00 (the Regulation) was promulgated and became law on October 3, 2008. Under this Regulation, the CMR is applicable to any Public works Project that is performed within the limits of, or that impact traffic on, any Public Road. The Municipal Limitation referenced in this Regulation is applicable only to projects where the Municipality is the Awarding Authority. Therefore, all projects must be considered and implemented in accordance with 701 CMR 7.00, and the Road Flagger and Police Detail Guidelines. By placing a project on the TIP, the Municipality acknowledges that 701 CMR 7.00 is applicable to its project and design and construction will be fully compliant with this Regulation. This information, and additional information relative to guidance and implementation of the Regulation can be found at the following link on the MassDOT Highway Division website: http://www.massdot.state.ma.us/Highway/flaggersmann.aspx

## 6. Air Quality Conformity Documentation

Since most of all of Massachusetts (with limited exceptions) was designated on 5/21/12 by the United States Environmental Protection Agency as "unclassifiable/ attainment" for the latest ozone standard, a conformity determination for the FFY 2017-2021 Old Colony TIP is not required. Further details and background information are provided below:

#### Introduction

The 1990 Clean Air Act Amendments (CAAA) require metropolitan planning organizations within nonattainment and maintenance areas to perform air quality conformity determinations prior to the approval of Regional Transportation Plans (RTPs) and Transportation Improvement Programs (TIPs), and at such other times as required by regulation. A nonattainment area is one that the U.S. Environmental Protection Agency (EPA) has designated as not meeting certain air quality standards. A maintenance area is a nonattainment area that now meets the standards and has been re-designated as maintaining the standard. A conformity determination is a demonstration that plans, programs, and projects are consistent with the State Implementation Plan (SIP) for attaining the air quality standards. The CAAA requirement to perform a conformity determination ensures that federal approval and funding go to transportation activities that are consistent with air quality goals.

The entire Commonwealth of Massachusetts was previously classified as nonattainment for ozone, and was divided into two nonattainment areas. The Eastern Massachusetts ozone nonattainment area included Barnstable, Bristol, Dukes, Essex, Middlesex, Nantucket, Norfolk, Plymouth, Suffolk, and Worcester counties. Berkshire, Franklin, Hampden, and Hampshire counties comprised the Western Massachusetts ozone nonattainment area. With these classifications, the 1990 Clean Air Act Amendments (CAAA) required the Commonwealth to reduce its emissions of volatile organic compounds (VOCs) and nitrogen oxides (NOx), the two major precursors to ozone formation to achieve attainment of the ozone standard.

#### 2008 Ozone Nonattainment Area

As of July 20, 2013, Dukes County, Massachusetts [Dukes County Wampanoag Tribe of Gay Head (Aquinnah) of Massachusetts] is nonattainment, classification marginal, for the 2008 8-Hour Ozone National Ambient Air Quality Standard (NAAQS), also known as the 2008 ozone standard. Final Rule: "Air Quality Designations for the 2008 Ozone National Ambient Air Quality Standards," Monday, May 21, 2012; (77 FR 30088); effective July 20, 2012.

Interagency Transportation Conformity Consultation has determined Dukes County, Massachusetts to be an isolated rural nonattainment area for the 2008 8-hour ozone standard.

<u>Isolated rural nonattainment and maintenance areas</u> are areas that do not contain or are not part of any metropolitan planning area as designated under the transportation planning regulations. Isolated rural areas do not have federally required metropolitan transportation plans or TIPs and do not have projects that are part of the emissions analysis of any MPO's metropolitan transportation plan or TIP. Projects in such areas are instead included in statewide transportation improvement programs. These areas are not donut areas. See 40 CFR Section 109(g) for conformity in isolated rural nonattainment and maintenance areas.

#### 1997 Ozone Nonattainment Areas

As of July 20, 2013, the 1997 8-Hour Ozone NAAQS (the 1997 ozone standard) is revoked for transportation conformity purposes in the Boston-Lawrence-Worcester (E. Mass), Massachusetts and the Springfield (W. Mass), Massachusetts area. Transportation conformity no longer applies to the 1997 ozone NAAQS in Massachusetts. Final Rule: "Implementation of the 2008 National Ambient Air Quality Standards for Ozone: Nonattainment Area Classifications Approach, Attainment Deadlines and Revocation of the 1997 Ozone Standards for Transportation Conformity Purposes," Monday, May 21, 2012; (77 FR 30160); effective July 20, 2012.

### Transportation conformity requirements under 40 CFR 93.109(b) that continue to apply:

These requirements must be addressed by Interagency Consultation and as appropriate the Transportation Plan (TP)/Transportation Improvement Program (TIP)/Transportation conformity evaluation document.

## **Latest Planning Assumptions**

Latest emissions model

Consultation (including:

- Evaluating events which will trigger new conformity determinations in addition to those triggering events established in §93.104;
- Which projects should be considered to have a significant change in design concept and scope from the transportation plan or TIP;
- Whether projects otherwise exempted should be treated as non-exempt in cases where potential adverse emissions impacts may exist;
- Past obstacles to implementation of TCMs which are behind the schedule established in the applicable implementation plan have been identified and are being overcome;
- Whether State and local agencies with influence over approvals or funding for TCMs are giving maximum priority to approval or funding for TCMs; [This process shall also consider whether delays in TCM implementation necessitate revisions to the applicable implementation plan to remove TCMs or substitute TCMs or other emission reduction measures).

## Congestion Mitigation and Air Quality Improvement (CMAQ) Program

The Congestion Mitigation and Air Quality Improvement (CMAQ) Program was created under the Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991, continued under the Transportation Equity Act for the 21<sup>st</sup> Century (TEA-21), the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), and the Moving Ahead for Progress in the 21<sup>st</sup> Century (MAP-21). The goals of the CMAQ program support: promoting operational and technological improvements, targeting major freight bottlenecks, and relieving urban congestion.

The purpose of the CMAQ program is to fund transportation projects or programs that will contribute to attainment or maintenance of the national ambient air quality standards (NAAQS) for ozone, carbon monoxide (CO), and particulate matter (PM). The main goal of the CMAQ program is to reduce emissions in nonattainment and maintenance areas and to mitigate congestion. Congestion relief can contribute to improvements in air quality by reducing travel delays, engine idle time, and unproductive fuel consumption.

## FFY 2017-2021 OLD COLONY TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

Since congestion relief projects also reduce idling, the negative emissions effects of "stop and go" driving, and the number of vehicles on the road, they have a corollary benefit of improving air quality. Based on their emissions reductions, these types of projects, including investments in improved system pricing and operations, are eligible for CMAQ funding.

## Eligible projects and programs include:

- Alternate Fuels and Vehicles
- Bicycle and Pedestrian Facilities and Programs
- Carpooling and Vanpooling
- Congestion Reduction & Traffic Flow Improvements
- Diesel Engine Retrofits & Other Advanced Truck Technologies
- Experimental Pilot Programs
- Extreme Low-Temperature Cold Start Programs
- Freight/Intermodal
- Idle Reduction
- Inspection/Maintenance (I/M) Programs
- Public Education and Outreach Activities
- Traffic Flow Improvements
- Training
- Transit Improvements
- Transportation Control Measures (TCMs)
- Transportation Management Associations
- Travel Demand Management

# **APPENDIX B - §450.334 - SELF CERTIFICATION COMPLIANCE STATEMENT – 3C PROCESS**

## §450.334 - Old Colony MPO Self Certification Compliance Statement

This will certify that the Comprehensive, Continuing, Cooperative Transportation Planning Process for the Old Colony Metropolitan Planning Organization is addressing major issues facing the region and certifies that the metropolitan transportation planning process is being carried out in accordance with all applicable requirements including:

- 1. 23 U.S.C. 134, 49 U.S.C. 5303, and this subpart;
- 2. In nonattainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93;
- 3. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
- 4. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
- 5. Section 1101(b) of the SAFETEA-LU (Pub. L. 109-59) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
- 6. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- 7. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;
- 8. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
- 9. Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
- 10. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

APPENDIX C - SELF-CERTIFICATION COMPLIANCE STATEMENT - 310 CMR 60.05: GLOBAL WARMING SOLUTIONS ACT REQUIREMENTS FOR THE TRANSPORTATION SECTOR AND MASSDOT

## 310 CMR 60.05: Global Warming Solutions Act Requirements for the Transportation Sector and the Massachusetts Department of Transportation

Self-Certification Compliance Statement for Metropolitan Planning Organizations

This will certify that the FFY 2017-2021 Old Colony Transportation Improvement Program (TIP) for the Old Colony Metropolitan Planning Organization (MPO) is in compliance with all applicable requirements in the State Regulation 310 CMR 60.05: Global Warming Solutions Act Requirements for the Transportation Sector and the Massachusetts Department of Transportation. The regulation requires the Metropolitan Planning Organizations (MPOs) to:

- 1. 310 CMR 60.05, 3(b)(1)(a): Evaluate and track the GHG emissions and impacts of RTPs and TIPs;
- 2. 310 CMR 60.05, 3(b)(1)(b): In consultation with MassDOT, develop and utilize procedures to prioritize and select projects in RTPs, TIPs, and STIPs based on factors that include GHG emissions and impacts;
- 3. 310 CMR 60.05, 3(b)(1)(c): Quantify net GHG emissions and impacts resulting from the projects in RTPs and TIPs and have made efforts to minimize GHG emissions and impacts;
- 4. 310 CMR 60.05, 3(b)(1)(d): Determine in consultation with MassDOT that the appropriate planning assumptions used for GHG emissions modeling are consistent with local land use policies, or that local authorities have made documented and credible commitments to establishing such consistency;
- 5. 310 CMR 60.05, 4(a)(2)(e): Develop public consultation procedures for GHG reporting and related GWSA requirements consistent with current and approved regional public participation plans;
- 310 CMR 60.05, 4(c): Prior to making final endorsements on the RTPs, TIPs, STIPs, and projects
  included in these plans, MassDOT and the MPOs shall include the GHG Assessment and information on
  related GWSA activities in RTPs and TIPs and provide an opportunity for public review and comment on
  the RTPs, and TIPs.
- 310 CMR 60.05, 6(a): After a final GHG assessment has been made by MassDOT and the MPOs, MassDOT and the MPOs shall submit MPO-endorsed RTPs and TIPs within 30 days of endorsement to the Department for review of the GHG assessment.

# APPENDIX D - SYSTEM LEVEL ESTIMATE OF NEEDS AND COST FOR MAINTAINING AND OPERATING THE HIGHWAY SYSTEM

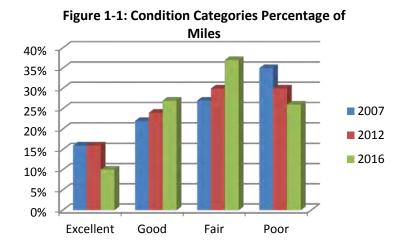

## System Level Estimate of Needs and Cost for Maintaining and Operating the Highway System

Given the limited funding, competing priorities, and the comprehensive list of transportation needs, it is crucial to maintain and operate the current system at optimal efficiency, in a safe manner, and in a state of good repair. Also, various management and operation methodologies such as ITS, Transportation Demand Management strategies, Park and Ride Lots, Transit Signal Priority, and Corridor Management strategies such as traffic signal coordination will help the region obtain its goals of improving mobility, improving safety, reducing greenhouse gases, improving sustainability, and promoting economic development.

As such in order to develop a system level estimate of needs and cost for maintaining and operating the highway system, the Old Colony MPO has refined and updated its pavement management system (PMS) in keeping with the principles of objectives-driven, performance-based planning, and in fulfilling its goal of keeping the highway system in a state of good repair. A well-maintained system in good repair reduces delays (due to long reconstruction periods), enhances freight movement, improves economic vitality, and provides opportunities to implement Complete Streets strategies (improving the sidewalk and bicycle facilities network). The PMS calculates the rate of deterioration of pavement and the implications for the cost of repairs. It calculates a Pavement Condition Index (PCI) score between 0 and 100 for the surveyed road segments and recommends a repair and cost based on the PCI score. Each road or road segment is placed in a condition category based on the PCI, which includes "Poor" (PCI = 0 to 64), "Fair" (PCI = 65 to 84), "Good" (PCI = 85 to 94), and "Excellent (PCI = 95 to 100).

The Old Colony MPO updates field inspections of the pavement surface every four years and supplements the data on an ongoing basis, as pavement reconstruction and resurfacing projects are completed on federal aid roads through the Old Colony Transportation Improvement Program (TIP). The repairs recommended by the PMS, based on the road condition, include five general default repair strategies.

The total federal-aid road mileage in the region included in Old Colony's PMS has increased to a total of 642 miles with the recent addition of Duxbury as an Old Colony member community. 5-4 summarizes Figure percentage of the federal aid mileage in each of the condition categories for the 2016 Old Colony RTP and for previous RTPs in 2012 and 2007. Figure 1-1 shows that in the previous 2012 RTP, 16 percent of the federal aid

roads were in the "Excellent" category, 24 percent in the "Good" category, 30 percent were in

the "Fair" category, and 30 percent were in the "Poor" category. In the 2007 RTP, 16 percent of the federal aid roads were in the "Excellent" category, 22 percent were in the "Good" category, 27 percent were in the "Fair" category, 35 percent were in the "Poor" category. The condition survey results from the 2014 pavement data survey show that although there are less roads in the "Poor" category, more of the federal aid roads have slipped into the "Good" and "Fair categories (27 percent and 37 percent compared to the previous 24 percent and 30 percent). Old Colony has set a goal to achieve 50% of federal-aid eligible roadways with PCI-based pavement ranking of "Excellent" or "Good" within 10 years. The total cost in improving all federal aid roads to a state of good repair is estimated by the PMS at \$213,891,765. The overall average PCI for all federal-aid roads is 77.

# Old Colony MPO Operations and Maintenance Summary Table For the Brockton Area Transit Authority State Fiscal Year 2017-2021

The numbers below represent actual numbers for the previous year, the current year budget/forecast approved by the RTA Advisory Board, and Projections for the out-years as used in the Program Preview meetings with the State. The figures provided in the below table are estimates and a forecast of projected funds necessary to meet the operating needs of the regional transit authority.

# **APPENDIX K - GREENHOUSE GAS (GHG) EMISSIONS ANALYSIS**

# 2017-2021 Transportation Improvement Program Greenhouse Gas Monitoring and Evaluation

#### Introduction

This section summarizes the greenhouse gas (GHG) impacts that are anticipated to result from the projects that are included in this FFY 2017-2021 Transportation Improvement Program (TIP). It includes a summary of the state laws and policies that call for reducing greenhouse gas in order to mitigate global climate change, actions that are being to respond to these state laws and policies, the role of regional planning and TIP development in reducing GHG emission and tracking these reductions, and the projected GHG emission impacts from the projects programmed in the TIP.

#### **State Policy Context**

The Global Warming Solutions Act (GWSA), which was signed into law in August 2008, makes Massachusetts a leader in setting aggressive and enforceable GHG reduction targets, and implementing policies and initiatives to achieve these targets. In keeping with the law, on December 29, 2010 the Massachusetts Executive Office of Energy and Environmental Affairs (EOEEA), in consultation with other state agencies and the public, released the Massachusetts Clean Energy and Climate Plan for 2020. In December 2014 the Department of Environmental Protection issued new regulations that require Metropolitan Planning Organizations to quantify impacts from project investments, track progress towards reductions, and consider impacts in the prioritization of GHG impacts from project investments. The targets for overall statewide GHG emissions are:

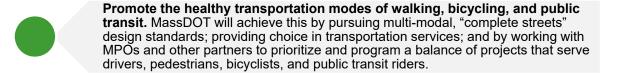

### **GreenDOT Policy**

The transportation sector is the single largest emitter of greenhouse gases, accounting for over a third of GHG emissions, and therefore the transportation sector is a key focus of the *Clean Energy and Climate Plan*. MassDOT's approach to supporting the implementation of the plan is set forth in its GreenDOT Policy Directive, a comprehensive sustainability initiative that sets three principal objectives:

**To support smart growth development.** MassDOT will achieve this by working with MPOs and other partners to make transportation investments that enable denser, smart growth development patterns that support reduced GHG emissions.

#### **GreenDOT Policy and Metropolitan Planning Organizations**

The Commonwealth's thirteen metropolitan planning organizations (MPOs) are integrally involved in helping to achieve the GreenDOT goals and supporting the GHG reductions mandated under the GWSA. The MPOs are most directly involved in helping to achieve the GHG emissions reductions under the second goal – to promote healthy transportation modes through prioritizing and programming an appropriate balance of roadway, transit, bicycle and pedestrian investments – and assist in the third goal by supporting smart growth development patterns through the creation of a balanced multi-modal transportation system. This will be realized through the transportation goals and policies espoused in the 2016 Regional Transportation Plans (RTPs), the major projects planned in the RTPs, and the mix of new transportation projects that are programmed and implemented through the TIPs. The GHG tracking and evaluation processes enable the MPOs to identify the anticipated GHG impacts of the planned and programmed projects, and also to use GHG impacts as a criterion in prioritizing transportation projects.

#### Regional GHG Tracking and Evaluation in RTPs

MassDOT coordinated with MPOs and regional planning agency (RPA) staffs on the implementation of GHG tracking and evaluation in development of each MPO's 2040 RTPs, which were adopted in Summer 2015.

Working together, MassDOT and the MPOs have attained the following milestones:

- Modeling and long-range statewide projections for GHG emissions resulting from the transportation sector. Using the Boston MPO's regional model and the statewide travel demand model for the remainder of the state, GHG emissions were projected for 2020 no-build and build conditions, and for 2040 no-build and build conditions.
- All of the MPOs included these GHG emission projections in their RTPs, along with a discussion of climate change and a statement of MPO support for reducing GHG emissions as a regional goal.

#### Project-Level GHG Tracking and Evaluation in the Transportation Improvement Program

It is also important to monitor and evaluate the GHG impacts of the transportation projects that are programmed in the MPO Transportation Improvement Programs (TIP). The TIP includes both the larger, regionally-significant projects from the RTPs, which have already had their aggregate GHG impacts calculated and reported in the RTP, as well as smaller projects that are not included in the RTP but that may nevertheless have impacts on GHG emissions. The principal objective of this tracking is to enable the MPOs to evaluate expected GHG impacts of different projects and to use this information as a criterion for prioritizing and programming projects in future TIPs.

In order to monitor and evaluate the GHG impacts of TIP projects, MassDOT and the MPOs have developed the following approach for identifying anticipated GHG impacts and quantifying GHG impacts of projects, when appropriate, through the TIP. Different types of projects will have different anticipated GHG emissions impacts. The different project categories are outlined on the next two pages with this region's project tracking sheet on the third page.

#### **Calculation of GHG Impacts for TIP Projects**

The Office of Transportation Planning at MassDOT provided the spreadsheets that are used for determining Congestion Management and Air Quality Improvement (CMAQ) eligibility. These spreadsheets require the same inputs as the CMAQ calculations, and have been adapted to provide CO<sub>2</sub> impacts. The data and analysis required for these calculations is available from functional design reports that should be submitted for projects that would produce a measurable GHG impact.

Projects with Quantified Impacts

RTP Projects - Major capacity expansion projects would be expected to have a significant impact on GHG emissions. However, these projects are included in the RTPs and analyzed using the statewide model or Boston regional model, which would reflect their GHG impacts. Therefore, no independent TIP calculations are required.

**Quantified Decrease in Emissions -** Projects that would be expected to produce a measurable decrease in emissions. The approach for calculating these impacts is described below. These projects should be categorized in the following manner:

- Quantified Decrease in Emissions from Traffic Operational Improvement - An intersection reconstruction or signalization project that is projected to reduce delay and congestion.
- Quantified Decrease in Emissions from Pedestrian and Bicycle Infrastructure - A shared-use path that would enable increased walking and biking and decreased vehicle-miles traveled (VMT).
- Quantified Decrease in Emissions from New/Additional Transit Service - A bus or shuttle service that would enable increased transit ridership and decreased VMT
- Quantified Decrease in Emissions from a Park and Ride Lot
   A park-and-ride lot that would enable increased transit ridership/ increased ridesharing and decreased VMT
- Quantified Decrease in Emissions from Bus Replacement
   A bus replacement that would directly reduce GHG emissions generated by that bus service.
- Quantifed Decrease in Emissions from Complete Streets Improvements
  - Improvements to roadway networks that include the addition of bicycle and pedestrian accommodations where none were present before.
- Quantified Decrease in Emissions from Other Improvement

**Quantified Increase in Emissions –** Projects that would be expected to produce a measurable increase in emissions.

Projects with Assumed Impacts

**No Assumed Impact/Negligible Impact on Emission -** Projects that do not change the capacity or use of a facility (e.g. a resurfacing project that restores a roadway to its previous condition, or a bridge rehabilitation/replacement that restores the bridge to its previous condition) would be assumed to have no GHG impact.

Assumed Nominal Decrease in Emissions - Projects that would be expected to produce a minor decrease in emissions that cannot be calculated with any precision. Examples of such projects include roadway repaving or reconstruction projects that add a new sidewalk or new bike lanes. Such a project would enable increased travel by walking or bicycling, but there may be not data or analysis to support any projections of GHG impacts. These projects should be categorized in the following manner:

- Assumed Nominal Decrease in Emissions from Sidewalk Infrastructure
- Assumed Nominal Decrease in Emissions from Bicycle Infrastructure
- Assumed Nominal Decrease in Emissions from Sidewalk and Bicycle Infrastructure
- Assumed Nominal Decrease in Emissions from Intelligent Transportation Systems (ITS) and/or Traffic Operational Improvements
- Assumed Nominal Decrease in Emissions from Other Improvements

**Assumed Nominal Increase in Emissions -** Projects that would be expected to produce a minor increase in emissions that cannot be calculated with any precision.

#### Regional Greenhouse Gas Impact Summary Tables for FFY 2017-2021 TIP

The following tables summarize the calculated quantitative and assumed qualitative impacts of the projects included in the regional FFY 2017-2021 TIP.

MassDOT Project ID	MassDOT Project Description	GHG Analysis Type	GHG Impact Description	GHG Impact by the Numbers
608134	BROCKTON- STORMWATER IMPROVEMENTS ALONG ROUTE 28	Qualitative	No assumed impact/negligible impact on emissions	

605038	PLYMOUTH- RECONSTRUCTION OF TAYLOR AVENUE, FROM WHITE HORSE ROAD TO MANOMET POINT ROAD, INCLUDES P-13-010	Qualitative	Quantified Decrease in Emissions (See Emissions Analysis Appendix)	2,011.100 kg Summer CO2
--------	---	-------------	---	-------------------------

## APPENDIX L - THIRTY-DAY PUBLIC REVIEW - NOTICE OF AVAILABILITY AND PUBLIC COMMENTS

### OLD COLONY PLANNING COUNCIL

Lee Hartmann, AICP <u>President</u> 70 School Street Brockton, MA 02301-4097

Pasquale Ciaramella

Executive Director
Telephone: (508) 583-1833
Fax: (508) 559-8768
Email: information@ocpcrpa.org

### NOTICE OF PUBLIC REVIEW AND COMMENT PERIOD

- FFY 2016-2019 TRANSPORTATION IMPROVEMENT PROGRAM (TIP) AMENDMENT 2
  - FFY 2017-2021 TRANSPORTATION IMPROVEMENT PROGRAM (TIP)
    - FFY 2017 UNIFIED PLANNINGWORK PROGRAM (UPWP)

In accordance with the Public Participation Process developed by the Old Colony Metropolitan Planning Organization (MPO), Old Colony Planning Council (OCPC) is making the FFY 2016-2019 Transportation Improvement Program (TIP) Amendment 2, the FFY 2017-2021 Transportation Improvement Program (TIP), and the FFY 2017 Unified Planning Work Program (UPWP) available for public review and comment. Copies of these documents are available for review at the OCPC Offices (8:30 a.m. to 4:00 p.m.), at http://www.ocpcrpa.org/, and/or upon request. This notice will initiate a 30-Day Public Review and Comment Period. This process will also be used as Brockton Area Transit Authority's (BAT) public participation process. BAT, the Federal Transit Administration (FTA) Section 5307(c) applicant, has consulted with the Old Colony MPO and concurs that the public involvement process adopted by the Old Colony MPO for development of the TIP satisfies the public hearing requirements that pertain to the development of the Program of Projects for the regular Section 5307, Urbanized Area Formula Program, grant applications including the provisions for public notice and the time established for public review and comment. Public notice of public involvement activities and time established for public review and comments on the TIP will satisfy the program of projects (POP) requirements. The public discussion of the TIP at Old Colony JTC, Old Colony MPO, and transportation meetings satisfies the Program of Projects (POP) public hearing requirements of the FTA. A public meeting of the OCPC and Old Colony MPO advisory committee, the Old Colony Joint Transportation Committee (JTC), is scheduled for July 14, 2016 at 12 PM. Furthermore, a public meeting of the Old Colony MPO is scheduled for July 26, 2016 at 10 AM to hear additional public comments and consider endorsement. Please contact Charles Kilmer at 508-583-1833 Extension 206 for further information.

Please send written comments to:

Old Colony Planning Council (OCPC) 70 School Street Brockton, MA 02301 Attention: Charles Kilmer

The Old Colony MPO fully complies with Title VI of the Civil Rights Act of 1964 and related statutes and regulations in all programs and activities. The Old Colony MPO operates without regard to race, color, or national origin (including limited English proficiency), age, sex, disability, ancestry, ethnicity, gender, gender identity or expression, sexual orientation, religion, creed, veteran's status, or background. Any person who believes him/herself or any specific class of persons, to be subject to discrimination prohibited by Title VI may by him/herself or by representative file a written complaint with the Old Colony MPO. Complaints are to be filed no later than 180 days from the date of the alleged discrimination. Please contact Pat Ciaramella at 508-583-1833 Extension 202 for more information.

FFY 2016-2019 TRANSPORTATION IMPROVE-MENT PROGRAM (TIP) AMENDMENT 2 FFY 2017-2021 TRANSPORTATION IMPROVE-MENT PROGRAM (TIP) FFY 2017 UNIFIED PLANNINGWORK PROGRAM (UPWP)

In accordance with the Public Participation Process developed by the Old Colony Metropolitan Planning Organization (MPO), Old Colony Planning Council (OCPC) is making the FFY 2016-2019 Transportation Improvement Program (TIP) Amendment 2, the FFY 2017-2021 Transportation Improvement Program (TIP), and the FFY 2017 Unified Planning Work Program (UPWP) available for public review and comment. Copies of these documents are available for review at the OCPC Offices (8:30 a.m. to 4:00 p.m.), at http://www.ocpcrpa.org/, and/or upon request. This notice will initiate a 30-Day Public Review and Comment Period. This process will also be used as Brockton Area Transit Authority's (BAT) public participation process. BAT, the Federal Transit Administration (FTA) Section 5307(c) applicant, has consulted with the Old Colony MPO and concurs that the public involvement process adopted by the Old Colony MPO for development of the TIP satisfies the public hearing requirements that pertain to the devel-opment of the Program of Projects for the regular Section 5307, Urbanized Area Formula Program, grant applications including the provisions for public notice and the time established for public review and comment. Public notice of public involvement activities and time established for public review and com-ments on the TIP will satisfy the program of projects (POP) requirements. The public discussion of the TIP at Old Colony JTC, Old Colony MPO, and transporta-tion meetings satisfies the Program of Projects (POP) public hearing requirements of the FTA. A public meeting of the OCPC and Old Colony MPO advisory committee, the Old Colony Joint Transportation Committee (JTC), is scheduled for July 14, 2016 at 12 PM. Furthermore, a public meeting of the Old Colony MPO is scheduled for July 26, 2016 at 10 AM to hear additional public comments and consider endorsement. Please contact Charles Kilmer at 508-583-1833 Extension 206 for further information.

Please send written comments to: Old Colony Planning Council (OCPC) 70 School Street Brockton, MA 02301 Attention: Charles Kilmer

7/11/2016	Richard O'Flaherty	East Bridgewater OCPC Delegate, and East Bridgewater JTC Delegate	This letter comes to you to again voice by objection to the East Bridgewater project identified in the 2017 -2021 TIP as project number 607941 being moved in the TIP to 2021 from its original schedule in 2019. My reasons for this are simple. First this roadway is a state numbered roadway that is maintained by the state during inclement weather. The mention that the Town of East Bridgewater should improve upon the road with sidewalks and such is without merit as the state undoubtedly would not allow that to happen. With the standards that the State imposes upon communities this idea certainly would be cost prohibitive for the town. Second as you are aware a new high school was recently built with access to and from by way of route 18. The Central School also	Noted. The East Bridgewater (607941) - Resurfacing and Sidewalk Construction On Bedford Street (Route 18), from Whitman Street (Route 106) to Central Street moved from FFY 2021 to FFY 2019.

has accessibility to route 18.1 firmly believe that a roadway should have sidewalks for school aged as well as adults to utilize for safe passage to get to school as well as leaving the school. Third the fire department is located in very close proximity to the entrances to the school as well as being located across the street from Carriage Crossing a busy strip mall. Unlike other communities our fire station does not have signalization in the event of emergencies that allow emergency equipment to leave the station and access the roadway in a much safer manner. Also there are no school signs on the street that notifies vehicular traffic that they need to reduce speed as they approach the school zone. Fourth the anticipation of CVS relocating from Carriage Crossing to the intersection of route 18 and Spring St. will present problems with increased traffic flow from its new location. OCPC has conducted studies in the past in respect to the center of Town and has deemed that improvements are necessary to provide better traffic flow.

My feeling is that the state should not wait to address the issue of improving route 18 æ planned and that the funding should stay in place with an anticipated start of the roadway project to commence sometime in 2019. The Town in the past has used its resources to make i m p r o v e m e n t s on secondary roadways and now is time for the state to do what is necessary to make route 18 safer with signage,

7/13/2016	Marc Tisdelle	Town of Stoughton	signalization and sidewalks where necessary. In the event that I am unable to attend the JTC meeting on July 14, 2016, I would like for this letter read into the record.  I would like to formally request that a Stoughton project be included on the upcoming STIP. In reviewing the DRAFT STIP I noticed Stoughton is not listed as having any projects. In the recent months, we have had many discussions with MassDOT and OCPC regarding the need for sidewalks on Route 138 (Washington Street) from Lincoln Street north to Charles Avenue. All parties seem to agree that this area has a high need for a sidewalk. The need for a sidewalk is warranted within the entire corridor as there is heavy pedestrian activity. The Town has recently completed a Master Plan and this project is listed as a high priority. This project will provide connectivity between the existing sidewalk networks in this area. It also falls in line with the approved Stoughton Complete Streets Policy.	Noted. The Stoughton (607403) - Corridor Improvements on Route 138 from Lincoln Street to Central Street, Including Intersection Improvements Route 138 (Washington Street) & Central Street added to FFY 2021.
7/14/2016	Old Colony Joint Transportation Committee (JTC)	Old Colony Region	The Old Colony Joint Transportation Committee reviewed and approved the Draft 2017-2021 TIP with two votes in the negative.	Noted.
7/18/2016	Ken Miller	FHWA	Please include new Freight Funding Category in the funding programs section.  Please clarify years under the TIP Adjustment and TIP Amendment procedures.	Category has been added.  Clarifications provided.

			Please include narrative that describes year five	Narrative will be added.
			of the TIP as more hypothetical than definitive.	
7/22/2016	Pamela Haznar	MassDOT District	Not confident that Whitman (607860) project will	Noted. Will discuss

			Recommending 2018.	

Comments as of Close of Business (COB) July 22, 2016

June 29, 2016

Pasquale Ciaramella, Executive Director Old Colony Planning Council 70 School Street Brockton, MA 02301

Dear Mr. Ciaramella:

The Massachusetts Department of Transportation (MassDOT) Office of Transportation Planning (OTP) has reviewed the draft 2017-2021 Transportation Improvement Plan (TIP) released by the Old Colony Metropolitan Planning Organization (MPO) on June 21, 2016. The following MassDOT comments include both general guidance and specific comments on the MPO's 3C planning process with regard to the content of this document as released for public review.

Please note the following comments specific to the information contained in the MPO's draft 2017-2021 TIP.

- National planning factors please provide narrative describing how the TIP reflects the national planning factors established in statute.
- Page numbering
  - o Page 23 34
    - The page ordering is not correct. The document goes from page 23 to 34. Please put page 34 in its appropriate location.
  - Please add page numbers to the appendices.
- Page 4 Congested Corridors
  - A map of the corridors would be beneficial to readers. Visualization of transportation issues should be provided whenever possible.
- Page 12 Legal Advertisements
  - Please include in an appendix, rather than at the front of the document.
     This will enhance readability.
- Pages 15-18 Project Universe
  - This table should include project scores and be sorted by highest score to lowest. This will assist the reader in understanding which projects within the universe provide the most benefit according to the MPO's evaluation criteria. This table should be preceded by a succinct narrative that explains the MPO's scoring system and evaluation process.

### Page 22 – Financial summary tables

- Please update the highway projects table so that it does not read that the MPO is endorsing a fiscally unconstrained collection of projects.
- Please update the transit projects table to include information about the apportionment of federal transit funds. The table as is would make it appear that Brockton Area Transit has received no apportionment.

### • 2017

605038 – Please program this project with National Highway
 Performance Program funding rather than Surface Transportation
 Program funding. Please also update the "Additional Information" field to reflect that the project is now at 100% design.

### 2018

- CMAQ Please do not over program CMAQ. The regional target for CMAQ is \$1,139,886 and for fiscal constraint purposes the MPO needs to program no more than this amount. Please reassign funding sources for projects 606264, 607337, and 607438 accordingly.
- 606264 Please update the project value with 4% inflation to \$4,810,084.
   Please also update the "Additional Information" field to reflect that the project is now at 75% design.
- 607438 Please update the project value with 4% inflation to \$1,062,986, the value reflected in ProjectInfo.
- Please work with Highway Division District 5 to program the available target funds.

### 2019

- 608143 Please do not over program CMAQ. The regional target for CMAQ is \$1,139,886 and for fiscal constraint purposes the MPO needs to program no more than this amount. Please reassign funding sources for project 608143 accordingly.
- o 608088 Please update the total project value in the "Additional Information" field to \$4,536,000 in Section 1A and Section 1D.
- 608086 Please update the total project value with 8% inflation to \$3,888,000 in the "Additional Information" field.
- Please work with Highway Division District 5 to program the available target funds.

### • 2020

- In the fiscal constrain box under Section 1A, please update the value of "Non-CMAQ/HSIP/TAP (Other)" target funds to \$8,127,109 and the "TAP" target funds to \$339,064.
- o. 607217 Please program this project at the total project value with 12% inflation: \$8,182,717 and update the "Additional Information" field.
- Please work with Highway Division District 5 to program the available target funds.

### 2021

- In the fiscal constrain box under Section 1A, please update the value of "Non-CMAQ/HSIP/TAP (Other)" target funds to \$8,127,109 and the "TAP" target funds to \$339,064.
- Please work with Highway Division District 5 to program the available target funds.
- Appendix E please remove the funding descriptions. They are redundant to the descriptions in the front of the document.
- Appendix H please move this text into the document near the Project Universe.
- Appendix I please update the Transportation Funding documents with the most recently provided summaries from the Office of Transportation Planning.
- Appendix K please update greenhouse gas emission results on statewide funded projects with the information that will be provided by the Office of Transportation Planning before endorsement.

Please contact me at (857) 368-8865 or Trey Joseph Wadsworth at (857) 368-8837 if you have any questions.

Sincerely,

David Mohler Executive Director

Office of Transportation Planning

# FFY 2017-2021 OLD COLONY TRANSPORTATION IMPROVEMENT PROGRAM (TIP) ADJUSTMENT 1

ENDORSED BY THE OLD COLONY MPO ON JANUARY 17, 2017

### PREPARED IN COOPERATION WITH:

- THE BROCKTON AREA TRANSIT AUTHORITY (BAT)
- THE MASSACHUSETTS DEPARTMENT OF TRANSPORTATION (MASSDOT)
- THE FEDERAL HIGHWAY ADMINISTRATION (FHWA)
- THE FEDERAL TRANSIT ADMINISTRATION (FTA)

PREPARED BY:
OLD COLONY PLANNING COUNCIL
70 SCHOOL STREET
BROCKTON, MASSACHUSETTS

### **Notice of Nondiscrimination Rights and Protections to Beneficiaries**

### Federal "Title VI/Nondiscrimination" Protections

The Old Colony Metropolitan Planning Organization (MPO) operates its programs, services, and activities in compliance with federal nondiscrimination laws including Title VI of the Civil Rights Act of 1964 (Title VI), the Civil Rights Restoration Act of 1987, and related statutes and regulations. Title VI prohibits discrimination in federally assisted programs and requires that no person in the United States of America shall, on the grounds of race, color, or national origin (including limited English proficiency), be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity receiving federal assistance. Related federal nondiscrimination laws administrated by the Federal Highway Administration, the Federal Transit Administration, or both prohibit discrimination on the basis of age, sex, and disability. These protected categories are contemplated within the Old Colony MPO's Title VI Programs consistent with federal interpretation and administration. Additionally, the Old Colony MPO provides meaningful access to its programs, services, and activities to individuals with limited English proficiency, in compliance with US Department of Transportation policy and guidance on federal Executive Order 13166.

### **State Nondiscrimination Protections**

The Old Colony MPO also complies with the Massachusetts Public Accommodation Law, M.G.L. c 272 §§ 92a, 98, 98a, prohibiting making any distinction, discrimination, or restriction in admission to or treatment in a place of public accommodation based on race, color, religious creed, national origin, sex, sexual orientation, disability, or ancestry. Likewise, the Old Colony MPO complies with the Governor's Executive Order 526, section 4 requiring all programs, activities, and services provided, performed, licensed, chartered, funded, regulated, or contracted for by the state shall be conducted without unlawful discrimination based on race, color, age, gender, ethnicity, sexual orientation, gender identity or expression, religion, creed, ancestry, national origin, disability, veteran's status (including Vietnam-era veterans), or background.

### <u>Additional Information</u>

To request additional information regarding Title VI and related federal and state nondiscrimination obligations, please contact:

701 CMR 7.00 Use of Road Flaggers and Police Details on Public Works Projects / 701 CMR 7.00 (the Regulation) was promulgated and became law on October 3, 2008. Under this Regulation, the CMR is applicable to any Public works Project that is performed within the limits of, or that impact traffic on, any Public Road. The Municipal Limitation referenced in this Regulation is applicable only to projects where the Municipality is the Awarding Authority. Therefore, all projects must be considered and implemented in accordance with 701 CMR 7.00, and the Road Flagger and Police Detail Guidelines. By placing a project on the TIP, the Municipality acknowledges that 701 CMR 7.00 is applicable to its project and design and construction will be fully compliant with this Regulation. This information, and additional information relative to guidance and implementation of the Regulation can be found at the following link on the MassDOT Highway Division website: http://www.massdot.state.ma.us/Highway/flaggers/main.aspx
