## Project Data

A Road Safety Audit for Five Corners in the Town of Easton was held on December 21, 2009 at the Easton Town Hall. Five Corners is the intersection of Foundry Street (Route 106/123), Depot Street (Route 123) and Bay Road. As indicated in Table 1, the audit team consisted of representatives from Federal, State, Regional and Local agencies and included a cross-section of engineering, planning, emergency response and legislative expertise.

## Background

The Federal Highway Administration defines a Road Safety Audit (RSA) as *the formal safety examination* of an existing or future road or intersection by an *independent, multidisciplinary team*. The purpose of an RSA is to *identify potential safety issues and possible opportunities for safety improvements* considering all roadway users. A Road Safety Audit was scheduled for the Five Corners intersection because it was identified as a high crash location. Five Corners is scheduled to be reconstructed in 2010 by the MassDOT Highway Division and is currently at the 100% design phase. 75% design plans were made available for review as part of the RSA. The RSA is intended to identify both short and long term safety improvements that can be made along the subject corridor, which can then be incorporated into the reconstruction project to the greatest extent practicable.

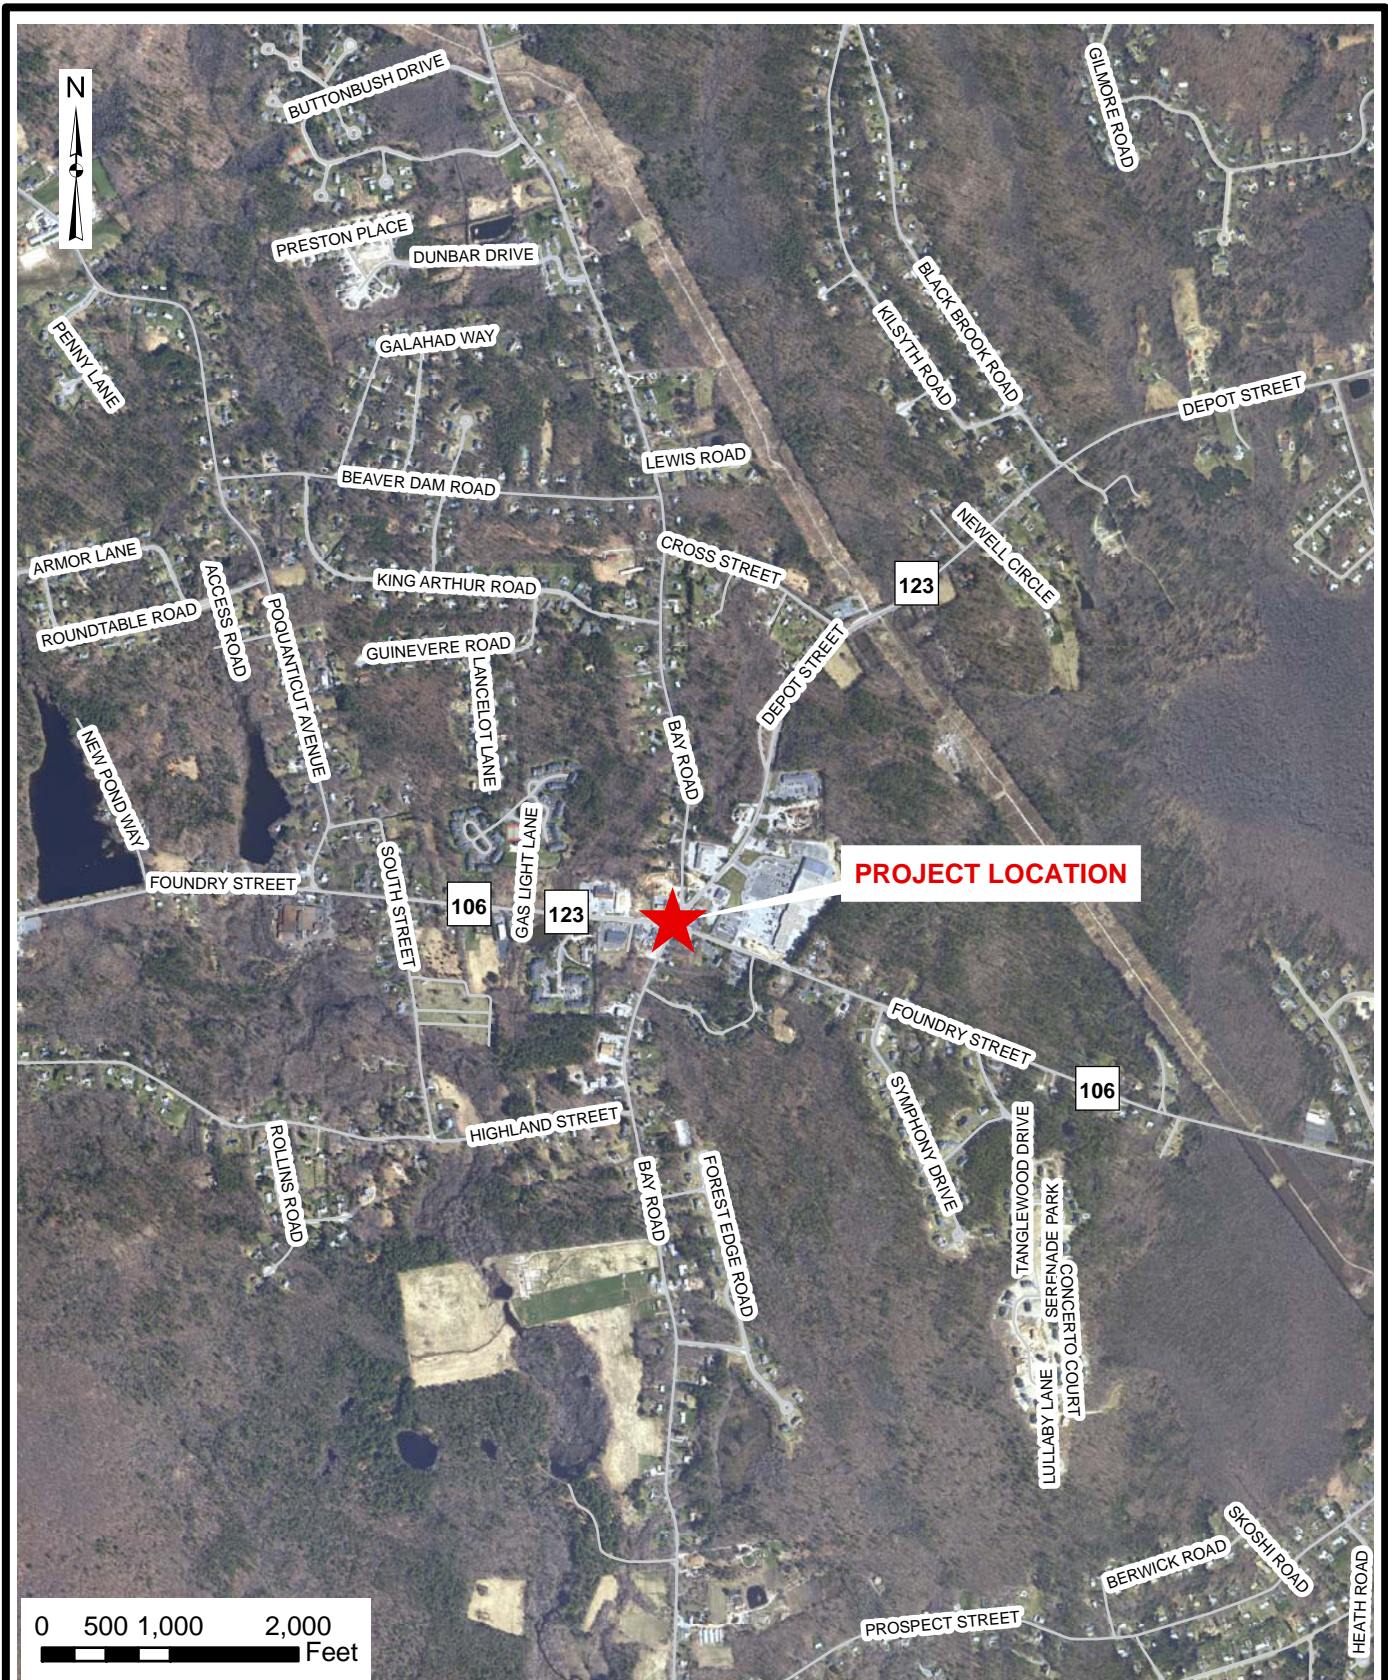

## Project Description

The Five Corners intersection of Foundry Street, Depot Street and Bay Road, shown in Figure 1, is located in the southwestern portion of Easton. Though commonly referred to as a single intersection, Five Corners consists of two separate closely spaced intersections. Foundry Street, Bay Road and Depot Street form a 4-way, signalized intersection. Bay Road intersects Depot Street at an acute angle to form a T-type unsignalized intersection approximately 125 feet north of the 4-way, signalized intersection.

Route 106 follows Foundry Street through the intersection, while Route 123 follows Foundry Street to the west and Depot Street to the north as part of its overall southwest-northeast alignment. Route 106 is an important regional roadway, connecting Easton with Mansfield to the west and West Bridgewater to the east. Foundry Street provides access to Route 138 and has an interchange with Route 24 to the east. Route 106 runs essentially parallel to I-495, and is known to serve as a cut-through for vehicles bound for Route 24 and points north. Route 123 is also an important regional roadway, connecting Easton with Norton and Attleboro to the southwest and Brockton to the northeast. Foundry Street, Depot Street and Bay Road are all Town-owned roadways. Depot Street and Foundry Street are functionally classified as an Urban Arterial, while Bay Road is classified as an Urban Collector.

Foundry Street is primarily one lane in each direction in the project vicinity, but widens to provide an 11 foot wide eastbound left turn lane onto Depot Street with approximately 300 feet of storage for queuing vehicles and a 12 foot wide through lane for Foundry Street traffic. There is a small delta island that channelizes the right turn movement from eastbound Foundry Street to Bay Road, which is under yield control. The westbound Foundry Street approach is approximately 25 feet wide and provides a single lane in each direction, and widens at the intersection to accommodate turning vehicles. The northbound Bay Road approach is approximately 28 feet wide and provides a single lane in each direction. The southbound Depot Street approach provides two lanes for the approximately 100 foot distance between Bay Road and the stop line at Foundry Street, with a 12 foot wide exclusive right turn lane and a 12 foot wide shared through and left turn lane. The two lanes are separated by a painted island.

Bay Road forms an acute angle with Depot Street and provides a single lane in each direction. The northbound Depot Street lane is approximately 20 feet wide, and effectively provides the ability for northbound vehicles to pass vehicles stopped to turn left onto Bay Road. The existing geometry requires

Figure 1  
**Location Map**

vehicles exiting Bay Road to cross the southbound right turn lane on Depot Street if they are intending to continue south on Bay Road or turn left onto Foundry Street eastbound.

**Bay Road approach at Depot Street**

The land use of the surrounding area is primarily commercial. There are gas stations on the northeast, southwest, and northwest corners of the 4-way signalized intersection, with an ATM kiosk on the southeast corner. There is a CVS Pharmacy on the northern corner of the Bay Road/Depot Street intersection, a Walgreens pharmacy adjacent to the Mobil station on the northwest corner, and a shopping plaza with a Shaw's supermarket north of the intersection. The gas station on the southwest corner has internal connections to parking areas for several other auto-related businesses, which collectively share three curb cuts along the eastbound Foundry Street approach.

The posted speed limit on Foundry Street in the vicinity of the intersection is 20 MPH. The speed limit for Foundry Street increases to 40 MPH beyond the intersection in both directions. Speed data for the intersection were provided by Old Colony Planning Council (OCPC), and were collected outside the 20 MPH speed zone. Speed data for Foundry Street eastbound approaching the intersection showed an average speed of 34 MPH and an 85<sup>th</sup> percentile speed of 41 MPH. The 85<sup>th</sup> percentile speed is defined as the speed at which 85 percent of the traffic is traveling at or below. Speed data for Foundry Street westbound approaching the intersection showed an average speed of 36 MPH and an 85<sup>th</sup> percentile speed of 43 MPH.

Speed regulations maintained by MassDOT Highway Division establish a 25 MPH speed limit for Depot Street in the vicinity of the intersection, which is not posted. Speed data for Depot Street southbound showed an average speed of 35 MPH and an 85<sup>th</sup> percentile speed of 40 MPH. Speed regulations also establish a 20 MPH speed zone for Bay Road in the vicinity of the intersection, which increases to 30 MPH south of the intersection. Speed data for Bay Road northbound approaching the intersection were recorded in the 30 MPH limit area showed an average speed of 36 MPH and an 85<sup>th</sup> percentile speed of 41 MPH. Complete speed data and speed regulations are included in the Appendix.

Crash data were collected and summarized by MassDOT for three years and are included in the Appendix. There were a total of 33 crashes at the intersection within the period from January 2006 to September 2008. 26 of these crashes are mapped on the collision diagram included in the Appendix. Ten of the 26 mapped crashes involved vehicles either entering or exiting one of the curb cuts for the gas station and other businesses on the southwest corner of the intersection. Eight of those ten crashes specifically involved a collision between a westbound vehicle turning left and an eastbound vehicle. It was noted during the audit meeting that 12 of the 33 crashes involved a teenage driver.

The intersection ranked 143<sup>rd</sup> on MassDOT's statewide list of the Top Crash Intersections from 2005 to 2007. This ranking is based on the number of crashes in MassDOT's database which can be georeferenced to a cluster area around the intersection. This cluster area experienced 56 crashes in the three year period. Seventeen of the 56 crashes involved an injury. The ranking is based on a weighted system which calculates the Equivalent Property Damage Only (EPDO) rating of the intersection. Fatal crashes are weighted 10 times and injury crashes are weighted 5 times. There were no fatal crashes in the three year study period.

Automatic Traffic Recorder (ATR) counts and Manual Turning Movement (MTM) counts were provided by OCPC. ATR data were recorded in 2006. Foundry Street carries 20,000 vehicles per day (vpd) west of the Five Corners intersection and 12,800 vpd east of the intersection. Depot Street carries 18,000 vpd north of the intersection. Bay Road carries 6,100 vpd south of the intersection, and 5,100 vpd north of the intersection. MTM data were recorded in 2005 for both the morning and afternoon peak periods. The morning peak hour occurred from 7:15 to 8:15 AM. There were 585 left turns from Foundry Street eastbound to Depot Street, and 401 right turns in the opposite direction from Depot Street to Foundry Street westbound during the AM peak hour. At the unsignalized intersection of Depot Street and Bay Road, there were 192 vehicles turning left onto Bay Road and 713 vehicles continuing north on Depot Street.

The afternoon peak hour occurred from 4:45 to 5:45 PM. During the afternoon peak hour, there were 440 left turns from Foundry Street eastbound to Depot Street, and 591 right turns in the opposite direction from Depot Street to Foundry Street westbound. At the unsignalized intersection of Depot Street and Bay Road, there were 123 vehicles turning left onto Bay Road and 541 vehicles continuing north on Depot Street. Complete ATR and MTM count data are included in the Appendix.

## Audit Observations

Following a brief introduction to the RSA process and a summary of traffic volumes and crash information, the audit participants were asked to discuss safety hazards at the Five Corners intersection. Audit participants then conducted a site visit as a group, at which time they offered observations on safety concerns and deficiencies. A summary of those major safety considerations is as follows:

- Capacity – A number of safety concerns discussed at the audit were the result of existing traffic signal operation and existing geometry. The lack of an exclusive left turn phase with an arrow indication for the heavy eastbound left turn lane and the lack of storage room for northbound left turning vehicles between Foundry Street and Bay Road were among the concerns.
- Signal head alignment – It was noted by Town of Easton personnel that the existing signal heads often become misaligned and require adjustment. This was observed during the audit site visit.
- Lighting – Roadway lighting is limited in the project area, specifically along the south side of Foundry Street. It was suggested that improved lighting at area businesses, including the Mobil gas station, draws the driver’s focus away from the roadway which reduces driver awareness and visibility of the intersection.
- Access Management – The study area is comprised of closely spaced businesses with multiple curb cuts. It was suggested during the audit that the heavy volume of traffic during peak periods is a contributor towards the number of crashes involving turning vehicles, as increased delay may encourage drivers to consider inadequate gaps.
- Pedestrian accommodations – There are existing pedestrian signals and pedestrian pushbuttons at the signalized intersection, but the lack of an exclusive pedestrian phase and the lack of sidewalks on some approaches were noted as a safety concern.
- Young drivers – It was mentioned at the audit that nearly one third of crashes involved teenagers. The Southeastern Regional Vocational High School is approximately two miles east of the Five Corners intersection on Foundry Street. A brief investigation of available data during the audit showed no direct correlation between time of day and crashes involving teenagers.
- Aesthetics – Although not specifically a safety concern, it was suggested during the audit that the Five Corners intersection acts as a gateway to Easton from the west and the southwest, and that landscaping improvements should be considered at the intersection.
- Emergency Preemption – The Easton Fire Chief noted that there is no emergency preemption equipment at the intersection, but that optical detectors that detect approaching emergency vehicles should be considered in the design of planned improvements at the intersection. It should be noted that the Town does not currently have emitters on their vehicles, but plans to install them in the future.

## Potential Safety Enhancements

After the site visit, audit participants returned to the meeting location to discuss the safety issues and consider improvements. Audit participants were encouraged to consider both short and long term improvements for each issue. Each improvement considered has been categorized as short-term, mid-term, or long-term based on the definitions shown in Table 2. Additionally, a cost category has been assigned to each improvement based on the parameters set forth in Table 2.

**Table 2. Estimated Time Frame and Costs Breakdown**

Time Frame		Costs	
Short-term	<1 year	Low	<\$10,000
Mid-term	1–3 years	Medium	\$10,001–\$50,000
Long-term	>3 years	High	>\$50,000

The following improvements were suggested by audit participants to improve safety issues associated with the Five Corners area.

- Exclusive left turn phase. Signal upgrades planned for the Five Corners intersection should include an exclusive advance left turn phase for vehicles turning from Foundry Street eastbound to Depot Street. 75% design plans reviewed in advance of the audit include this phase. This is a mid-term, low cost improvement if done in conjunction with already planned traffic signal improvements.
- Increase capacity on Depot Street northbound between Foundry Street and Bay Road. The existing geometry provides one wide northbound lane and only 100 feet of storage for left turning vehicles between Foundry Street and Bay Road. 75% design plans reviewed in advance of the audit show two general purpose lanes on this approach, which will allow left turning vehicles to queue in the left lane while through vehicles can continue unimpeded in the right lane. The Bay Road approach to Depot Street has been realigned so that Bay Road intersects Depot Street at a 90° angle. This realignment increases the storage space between the intersections to approximately 180 feet. This is a mid-term, low cost improvement if done in conjunction with already planned geometric improvements.
- Timing improvements. It was suggested by an audit participant that signal timing improvements can be made at the existing intersection in advance of the proposed reconstruction project. This is a short-term, low cost improvement.
- Install bracket mounted signal heads. Signal upgrades at the Five Corners intersection should include bracket mounted signal heads instead of free-swinging signal heads. This will prevent the signal heads from becoming misaligned due to wind as they do today. This is a mid-term, low cost improvement if done in conjunction with already planned geometric improvements.
- Upgrade lighting at the intersection. It was suggested that roadway lighting should be improved along the along Foundry Street and at the Five Corners intersection. This improvement would

involve installing overhead lights on existing utility poles. This is a mid-term, medium cost improvement. The Town of Easton would be responsible for paying utility costs.

- Improve access management. There are a significant number of driveways and access points along Foundry Street in the vicinity of the intersection, specifically at the southwest corner of the intersection. Crash data show that these driveways create a safety issue due to the increased number of turning movements and conflicts created with turning vehicles. It is recommended that the Town of Easton verify permits against existing driveway openings and approach existing business owners about combining or eliminating driveway openings, or designating enter and exit driveways with signage for right turn only exiting. It was noted during the audit that the combination of driveways could prove challenging because most businesses in the area are on separate parcels, even if they share an internal connection. This is a short-term, low cost improvement that could be done in conjunction with already planned improvements.
- Provide pedestrian accommodations. It is recommended that sidewalks be installed on all approaches as part of the upcoming reconstruction project. In conjunction with that work, crosswalks, pedestrian pushbuttons and an exclusive pedestrian phase should be provided at the signalized Five Corners intersection. This is a mid-term, high cost improvement that should be done in conjunction with already planned improvements.
- Education. Due to the relatively high percentage of crashes involving teenage drivers, education should be used to increase awareness of the safety concerns at the intersection. The Easton Police Department should work with students at the nearby Southeastern Regional Vocational High School, as well as the Easton High School, in order to educate young drivers to exercise safe driving habits throughout Easton. This is a short-term, low cost solution.
- Install vegetation. Although not necessarily a safety improvement, the proposed design should consider trees and shrubs as part of the proposed design. The designer should work closely with MassDOT to insure that the style and/or placement of vegetation will not impede sight lines. This is a mid-term, medium cost improvement if done in conjunction with already planned improvements. The Town of Easton would be responsible for the cost.
- Provide emergency preemption. The Town of Easton does not currently have optical emitter equipment on its emergency vehicles, but plans to install equipment in the future. The proposed design should include emergency preemption equipment as part of the proposed signal layout. 75% design plans reviewed in advance of the audit included emergency preemption equipment. This is a mid-term, medium cost improvement if done in conjunction with already planned geometric improvements.
- Install no left turn sign or island. These were actions discussed at the audit as potential solutions to prevent westbound Foundry Street vehicles from turning left into the gas station and other businesses on the southwest corner of the intersection. It was believed that a sign would prove ineffective at preventing left turns, and a barrier island would require additional widening beyond the extensive widening already proposed to accommodate an additional turning lane for the Foundry Street eastbound approach. As a result, this improvement is not recommended.

## Summary of Road Safety Audit

Table 3 summarizes potential recommendations discussed by the audit team. The recommendations are categorized based on the potential safety payoff, as well as by time frame and cost. The safety payoff is a qualitative judgment of the effectiveness of the potential safety improvements. Each recommendation has a responsibility assigned to it stating whether MassDOT or the Town of Easton would be responsible for implementing the recommended improvement. “Project” refers to improvements that are assumed to be included or could reasonably be accommodated as part of the planned reconstruction of the intersection. The cost and time frame of many improvements is considered relative to inclusion in already planned improvements.

**Table 3. Potential Safety Enhancement Summary**

<b>Safety Issue</b>	<b>Safety Enhancement</b>	<b>Responsibility</b>	<b>Safety Payoff</b>	<b>Time Frame</b>	<b>Cost</b>
Capacity	Provide exclusive left turn phase.	Project	High	Mid-term	\$5,000
Capacity	Improve capacity on Depot Street by providing 2 northbound lanes and realigning Bay Road approach.	Project	High	Mid-term	TBD
Capacity	Adjust signal timing	Project	Medium	Short-term	\$1,000
Lighting	Install overhead lights on existing utility poles.	Project	Medium	Mid-term	\$25,000
Access Management	Investigate curb cut permits and approach business owners about consolidation of driveways and other access ideas.	Town	Medium	Short-term	\$2,000
Emergency Preemption	Include emergency preemption equipment as part of proposed traffic signal.	Project	Medium	Mid-term	\$5,000
Young Drivers	Town to initiate education programs targeted at young drivers.	Town	Medium	Short-term	TBD
Pedestrian Accommodations	Install crosswalks, provide pushbuttons and exclusive pedestrian phase	Project	Low	Mid-term	\$20,000
Signal Head Alignment	Install bracket-mounted signal heads	Project	Low	Mid-term	\$2,000
Aesthetics	Include vegetation as part of proposed improvements.	Town	Low	Mid-term	\$10,000

## Appendix A. RSA Meeting Agenda

---

# Agenda

## Road Safety Audit

Easton – Foundry Street (Route 106) 2 Intersections  
Five Corners and Turnpike Street (Route 138)

Meeting Location: Easton Town Hall, 136 Elm Street  
Monday, December 21st, 2009  
10:00 AM – 12:30 PM

**Type of meeting:** High Crash Location – Road Safety Audit  
**Attendees:** Invited Participants to Comprise a Multidisciplinary Team  
**Please bring:** Thoughts and Enthusiasm!!

- 10:00 AM**                      **Welcome and Introductions**
- 10:15 AM**                      **Review of Site Specific Material**
- Crash, Speed & Volume Summaries
  - Existing Geometries and Conditions
- 11:00 AM**                      **Visit the Site**
- Drive to the “Five Corners” intersection Foundry Street / Depot Street / Bay Road
  - As a group, identify areas for improvement
  - Drive to the intersection of Foundry Street / Turnpike Street
  - As a group, identify areas for improvement
- 11:45 AM**                      **Completion of RSA**
- Finalize discussion on all areas for improvement
  - Discuss potential improvements with pros and cons and record possible countermeasures
- 12:30 PM**                      **Adjourn for the Day – but the RSA has not ended**

### Instructions for Participants:

- Before attending the RSA on December 21st, participants are encouraged to drive through the two intersections and complete/consider elements on the RSA Prompt List with a focus on safety.
- All participants will be actively involved in the process throughout. Participants are encouraged to come with thoughts and ideas, but are reminded that the synergy that develops and respect for others’ opinions are key elements to the success of the overall RSA process.
- After the RSA meeting, participants will be asked to comment and respond to the document materials to assure it is reflective of the RSA completed by the multidisciplinary team.

### Crash Summary for Foundry Street (Rte 123/106) and Bay Road / Depot Street Intersection, Easton MA

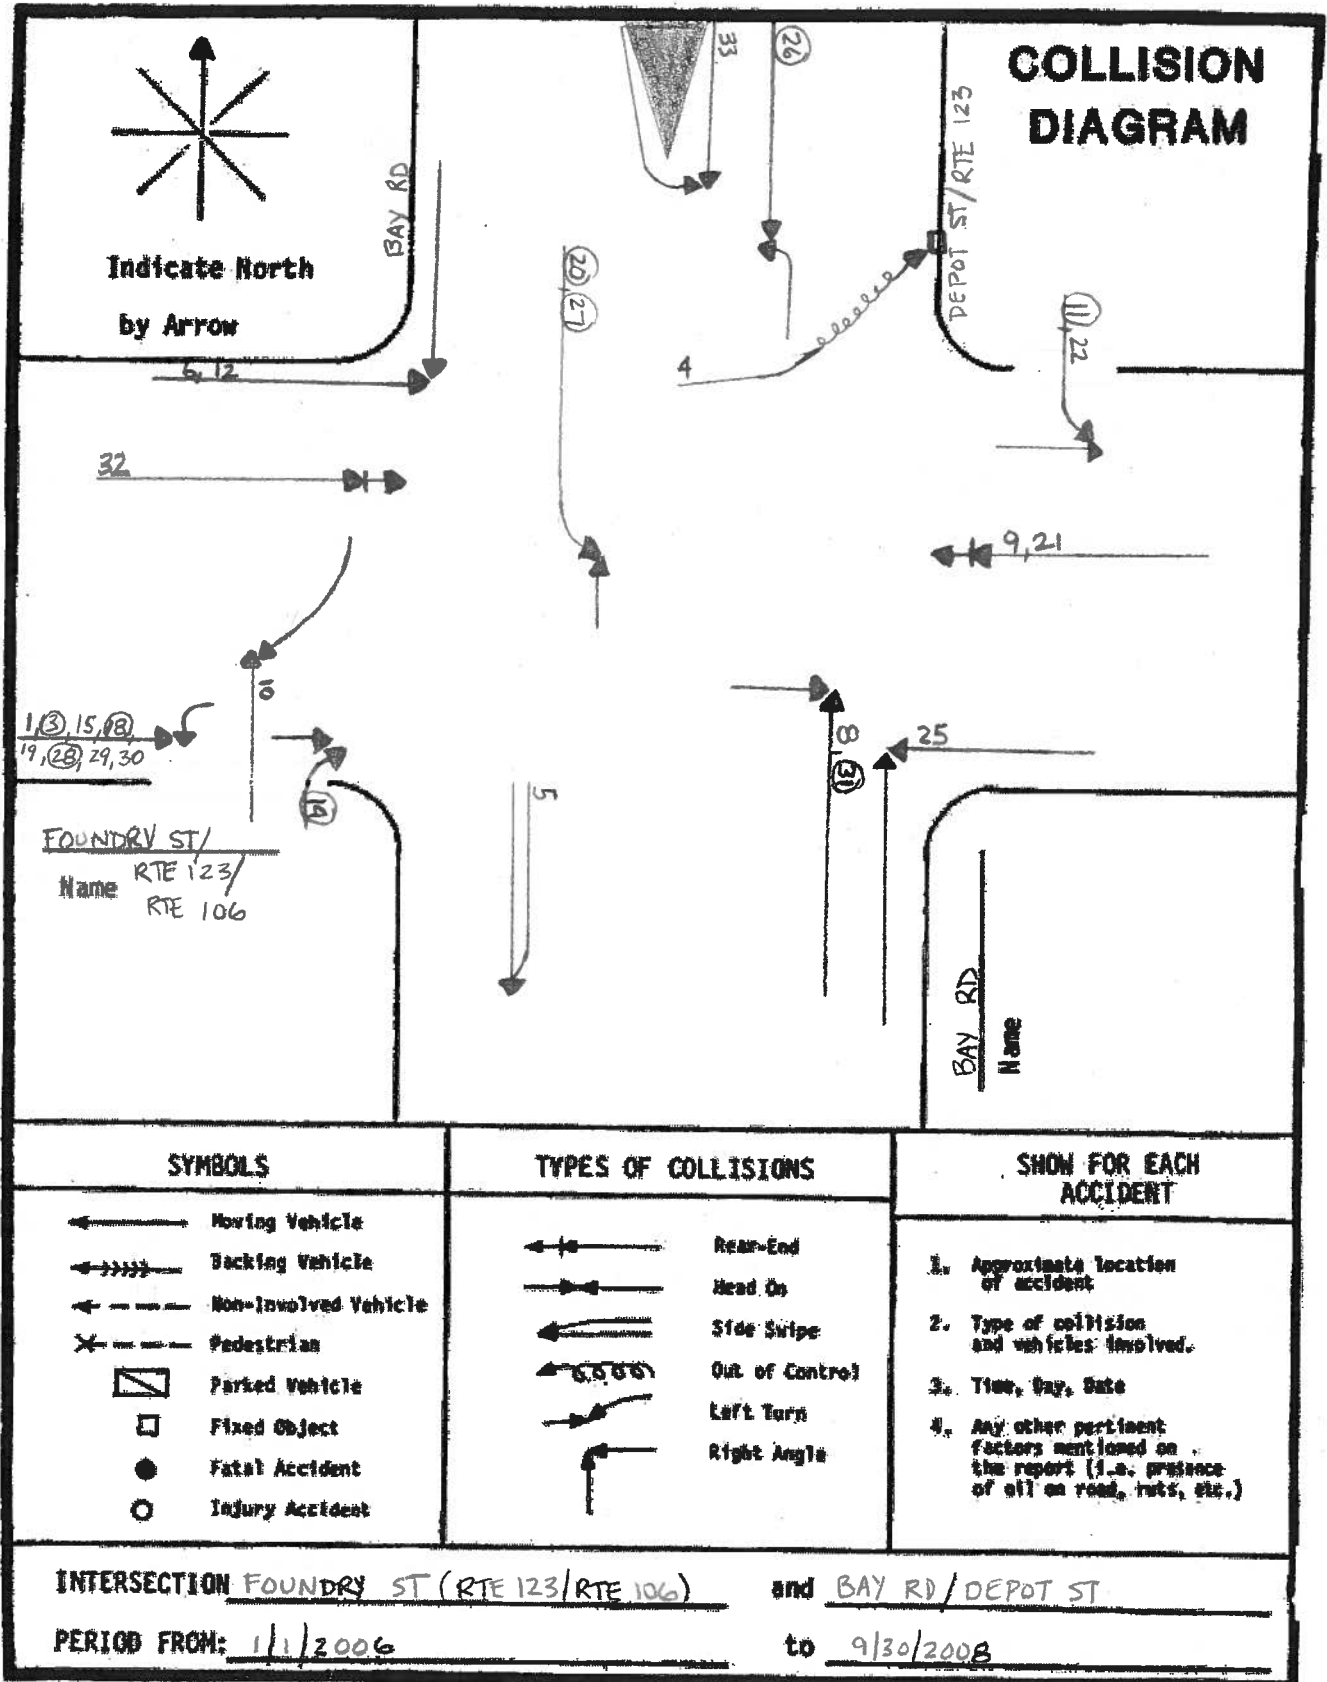

Crash Number	Crash Day	Crash Date	Time of Day	Manner of Collision	Light Condition	Weather Condition	Road Surface	Driver Contributing Code	Driver Ages	Comments
1	Friday	January 6, 2006	7:45 AM	Angle	Daylight	Clear	Dry	No improper driving	19, 19	Vehicle turning into 490 Foundry St.
2	Saturday	February 11, 2006	9:52 AM							
3	Thursday	March 30, 2006	8:32 AM	Angle	Daylight	Clear	Dry	Other improper action	36, 47	Vehicle turning into 496 Foundry St.
4	Thursday	May 4, 2006	6:49 AM	Head on	Daylight	Cloudy	Wet	Operating vehicle in erratic, reckless, careless, negligent, or aggressive manner	17, 46	Vehicle traveling at high rate of speed through intersection, lost control of car & hit curb & then another vehicle
5	Monday	July 3, 2006	11:25 AM	Angle	Daylight	Clear	Dry	Disregarded traffic signs, signals, road markings	42, 22	Vehicle tried to pass in a no passing zone
6	Thursday	July 20, 2006	11:48 AM	Angle	Daylight	Cloudy	Dry	Disregarded traffic signs, signals, road markings	60, 50	Vehicle ran red light from E/B approach
7	Saturday	July 22, 2006	1:43 PM						48, 65	
8	Friday	July 28, 2006	7:16 PM	Angle	Dusk	Rain	Wet	Disregarded traffic signs, signals, road markings	39, 18	Vehicle ran red light from E/B approach
9	Friday	August 11, 2006	6:23 PM	Rear-end	Daylight	Clear	Dry	Cellular telephone	53, 38	Distracted driver
10	Thursday	September 14, 2006	2:19 PM	Angle	Daylight	Rain	Wet	Other improper action	16, 36	Driver unable to turn and shift at the same time & panicked
11	Friday	September 15, 2006	2:58 PM	Angle	Daylight	Rain	Wet	Failed to yield right of way	17, 23	Vehicle exiting Sunoco
12	Tuesday	October 3, 2006	5:21 AM	Angle	Dawn	Clear	Dry	Unknown	44, 17	Vehicle possibly ran red light from N/B approach
13	Wednesday	October 18, 2006	5:48 PM						71, 31	Hit & run
14	Thursday	October 19, 2006	6:46 AM	Angle	Daylight	Cloudy	Dry	Failed to yield right of way	32, 17	Vehicle exiting 493 Foundry St.
15	Thursday	October 19, 2006	10:07 AM	Angle	Daylight	Clear	Dry	Failed to yield right of way	17, 53	Vehicle turning into 490 Foundry St.
16	Friday	November 3, 2006	3:28 PM							Vehicle sideswiped another vehicle
17	Monday	February 26, 2007	6:15 AM							Crash occurred near Mobil Station
18	Monday	April 2, 2007	8:02 AM	Angle	Daylight	Rain	Wet	Failed to yield right of way	28, 39	Vehicle turning into 490 Foundry St.
19	Friday	April 6, 2007	10:51 AM	Angle	Daylight	Clear	Dry	Failed to yield right of way	17, 39	Vehicle turning into 490 Foundry St.
20	Wednesday	April 11, 2007	3:37 PM	Angle	Daylight	Clear	Dry	Failed to yield right of way	41, 54	
21	Thursday	June 28, 2007	7:41 AM	Rear-end	Daylight	Clear	Dry	Unknown	62, unknown	Hit & run
22	Monday	September 24, 2007	12:50 PM	Angle	Daylight	Clear	Dry	Failed to yield right of way	41, 74	Vehicle exiting Sunoco
23	Saturday	October 20, 2007	12:55 PM							
24	Wednesday	November 7, 2007	6:49 PM	Angle	Dusk	Clear	Dry	Unknown	27, 38	
25	Thursday	November 22, 2007	6:09 PM	Angle	Dark - lighted roadway	Cloudy	Wet	Disregarded traffic signs, signals, road markings	61, 80	Vehicle ran red light from W/B approach
26	Friday	February 1, 2008	12:43 PM	Head on	Daylight	Rain	Wet	Failed to yield right of way	64, 21	
27	Saturday	March 8, 2008	2:02 PM	Angle	Daylight	Rain	Wet	Failed to yield right of way	17, 27	
28	Thursday	May 1, 2008	7:10 AM	Angle	Daylight	Clear	Dry	Made an improper turn	24, 46	Vehicle turning into 493 Foundry St.
29	Thursday	July 24, 2008	3:29 PM	Angle	Daylight	Rain	Wet	Failed to yield right of way	17, 61	Vehicle attempting to turn into Five Corners
30	Friday	August 8, 2008	4:15 PM	Angle	Daylight	Cloudy	Dry	Failed to yield right of way	50, 54	Petroleum
31	Wednesday	August 13, 2008	9:12 AM	Angle	Daylight	Clear	Dry	Failed to yield right of way	52, 51	Vehicle turning into 490 Foundry St.
32	Monday	August 25, 2008	1:11 PM	Rear-end	Daylight	Clear	Dry	Inattention	28, 38	
33	Friday	September 19, 2008	4:41 PM	Sideswipe, same direction	Daylight	Clear	Dry	Failed to yield right of way	17, 41	

Not mapped

There were only incident reports for crash numbers 2, 7, 13, 16, 17, and 23. These crashes were unable to be mapped due to lack of information. Crash number 24 was unable to be mapped due to vague crash information on crash report.
