Project Data

A Road Safety Audit for the intersection of Foundry Street (Route 106) and Turnpike Street (Route 138) in the Town of Easton was held on December 21, 2009 at the Easton Town Hall. As indicated in Table 1, the audit team consisted of representatives from Federal, State, Regional and Local agencies and included a cross-section of engineering, planning, emergency response and legislative expertise.

Table 1. Participating Audit Team Members

Audit Team Member	Agency/Affiliation
Bonnie Polin	MassDOT Highway Division – Safety Section
Lisa Schletzbaum	MassDOT Highway Division – Safety Section
Pat Ciaramella	Old Colony Planning Council - Director
Charles Kilmer	Old Colony Planning Council
Ray Guarino	Old Colony Planning Council
Bill McNulty	Old Colony Planning Council
Jed Cornock	Old Colony Planning Council
David Colton	Town Administrator, Town of Easton
Maurice Goulet	DPW Operations Manager, Town of Easton
Colleen Corona	Selectman, Town of Easton
Alice Savage	Planning Director, Town of Easton
Allen Krajcik	Police Chief, Town of Easton
Thomas Stone	Fire Chief, Town of Easton
Tim White	Federal Highway Administration

Christine Keches	BETA Group, Inc.
Al Miller	MassDOT Highway Division – Project Management
Benjamin Janelli	Legislature – Rep. Creedon’s Office
Rep. David Flynn	Legislature

Background

The Federal Highway Administration defines a Road Safety Audit (RSA) as *the formal safety examination* of an existing or future road or intersection by an *independent, multidisciplinary team*. The purpose of an RSA is to *identify potential safety issues and possible opportunities for safety improvements* considering all roadway users. A Road Safety Audit was scheduled for the intersection of Foundry Street (Route 106) and Turnpike Street (Route 138) because it was identified as a high crash location, making the construction eligible for Federal safety funding, and as a priority location for safety improvements. Regardless of the funding source, the purpose of the RSA is to identify both short term and long term safety improvements that can be made at the subject intersection.

Project Description

The intersection of Foundry Street and Turnpike Street, shown in Figure 1, is located in the southeastern portion of Easton. Turnpike Street (Route 138) is a state-owned roadway functionally classified as an Urban Minor Arterial. Foundry Street is a town-owned roadway functionally classified as an Urban Principal Arterial. Foundry Street is an important regional roadway, connecting Easton with Mansfield to the west and West Bridgewater to the east. Route 106 runs essentially parallel to I-495, has an interchange with Route 24 approximately 1.2 miles east of Route 138 and is known to serve as a cut-through for vehicles bound for Route 24 and points north. Route 138 is also a significant regional roadway, connecting Easton with neighboring communities Stoughton and Raynham. Route 138 provides access to I-495 to the south and runs parallel to Route 24. As such, Route 138 becomes a preferred alternative route when delays exist on Route 24.

Foundry Street and Turnpike Street form a 4-way intersection under traffic signal control. The signal operates under basic two phase operation and has no pedestrian signal indications. There are sidewalks on the north side of Foundry Street and along both sides of Turnpike Street in the vicinity of the intersection, but no continuous sidewalks on either roadway. There are no crosswalks at the intersection.

Turnpike Street is primarily one lane in each direction in the project vicinity, but widens to provide two lanes for both the southbound and northbound approaches. A wide departure lane on each side of the intersection allows traffic to merge back into one lane. Foundry Street also widens to provide two lanes for the eastbound approach and has a wide departure lane on the opposite side to allow vehicles to merge back into one lane. The Foundry Street westbound approach operates as two lanes although there is no lane line delineating the two lanes. There are no arrow markings to identify lane assignments for any of the four approaches.

The land use of the surrounding area is a mix between commercial and residential. There is a 7 Eleven convenience store with gas station on the northeast corner and office buildings on the southeast and southwest corners. There is a vacant lot on the northwest corner which an audit participant noted was formerly the site of a gas station. There are single family homes along Foundry Street west of the intersection and along Turnpike Street south of the intersection, and several apartment and condominium complexes along Turnpike Street and along Foundry Street east of the intersection.

 Turnpike Street (Route 138)

ROAD SAFETY AUDIT

EASTON, MA

Figure 1
Location Map

Foundry Street westbound at Turnpike Street

Speed regulations maintained by MassDOT Highway Division establish a 25 MPH speed limit for Foundry Street in the vicinity of the intersection, which is not posted. The speed limit for Foundry Street increases to 40 MPH beyond the intersection in both directions. Speed data for the intersection were provided by Old Colony Planning Council (OCPC). Speed data for Foundry Street westbound approaching the intersection were recorded outside the 25 MPH speed zone and showed an average speed of 37 MPH and an 85th percentile speed of 45 MPH. The 85th percentile speed is defined as the speed at which 85 percent of the traffic is traveling at or below. The posted speed limit on Turnpike Street is 40 MPH in the vicinity of the intersection. Speed data for Turnpike Street southbound showed an average speed of 40 MPH and an 85th percentile speed of 48 MPH. Complete speed data and speed regulations are included in the Appendix.

Crash data were collected and summarized by MassDOT for three years and are included in the Appendix. There were a total of 31 crashes at the intersection within the period from January 2006 to October 2008. 28 of these crashes are mapped on the collision diagram included in the Appendix. 18 of the 28 mapped crashes were angle type crashes, with five of those 18 occurring between a westbound vehicle turning left and an eastbound through vehicle. These crashes may be the result of drivers taking chances on insufficient gaps.

The intersection ranked 136th on MassDOT's statewide list of the Top Crash Intersections from 2005 to 2007. This ranking is based on the number of crashes in MassDOT's database which can be georeferenced to a cluster area around the intersection. This cluster area experienced 50 crashes in the three year period. The ranking is then determined using a weighted system which calculates the Equivalent Property Damage Only (EPDO) rating of the intersection. Fatal crashes are weighted 10 times and injury crashes are weighted 5 times. Nineteen of the 50 crashes involved an injury. There were no fatal crashes in the three year study period.

Automatic Traffic Recorder (ATR) counts and Manual Turning Movement (MTM) counts were provided by OCPC. ATR data were recorded in 2005. Foundry Street carries 17,700 vehicles per day (vpd) east of Turnpike Street. No data were available for Foundry Street west of Turnpike Street. Turnpike Street carries 15,900 vpd north of Foundry Street and 18,000 vpd south of Foundry Street. MTM data were recorded in 2006 for both the morning and afternoon peak periods. The morning peak hour occurred from 7:15 to 8:15 AM. Of note were 171 left turns from Foundry Street westbound to Turnpike Street southbound, and 391 right turns in the opposite direction from Turnpike Street northbound to Foundry Street eastbound during the AM peak hour.

The afternoon peak hour occurred from 4:30 to 5:30 PM. During the afternoon peak hour, there were 363 left turns from Foundry Street westbound to Turnpike Street southbound, and 257 right turns in the opposite direction from Turnpike Street northbound to Foundry Street eastbound. Complete ATR and MTM count data are included in the Appendix.

Audit Observations

Following a brief introduction to the RSA process and a summary of traffic volumes and crash information, the audit participants were asked to discuss safety issues at the intersection of Foundry Street (Route 106) and Turnpike Street (Route 138). Audit participants then conducted a site visit as a group, at which time they offered observations on safety concerns and deficiencies. A summary of those major safety considerations is as follows:

- **Pavement Markings** – The existing markings are faded, and there are no arrows to indicate lane assignments. The westbound Foundry Street approach has no lane line to indicate a two lane configuration, although it does operate as two lanes and sufficient width exists to accommodate two lanes.
- **Signal Phasing & Timing** – The existing signal operates under simple two-phase operation, which allows no protected phase for left-turning vehicles on any of the approaches. There was some concern amongst audit participants that the all red clearance time is not sufficient.
- **Signal Visibility** – The existing incandescent bulbs and lack of backplates were cited as a safety concern. Upgrades to these features would increase visibility of the signal indications for approaching vehicles.
- **Signal Alignment** – The location of signal heads was cited as a safety concern, specifically for the westbound Foundry Street approach where there is a far left side and right side ground mounted signal post and only one overhead signal head. In addition, signals have rotated slightly and are not directly facing traffic flow due to the lack of a tether wire.
- **Lighting** – It was suggested that although roadway lighting exists in the area, it is insufficient and should be upgraded.
- **Pedestrian Accommodations** – The intersection has sidewalks on some approaches, but no existing crosswalks or pedestrian pushbuttons to provide protection to pedestrians wishing to cross the street. Audit participants suggested that the number of apartment and condominium complexes in the area has generated increased pedestrian traffic.
- **Downgrade on Foundry Street eastbound** – The Foundry Street eastbound approach has a downhill grade. This was raised as a safety concern because the downhill grade reduces visibility of the approaching signal for eastbound traffic. It should be noted that there is an advance warning sign for the traffic signal approximately 600 feet in advance of the intersection.

- Lane geometry – All four approaches at the intersection have two general purpose lanes that merge into one travel lane on the departure side of the intersection. Some audit participants suggested that the left lane is not well aligned for through movements, specifically on the Foundry Street approaches.
- Speed – Speed was mentioned as a safety concern at the intersection. It should be noted that recorded speeds are consistent with posted or established speed limits at the intersection.

**Foundry Street eastbound at Turnpike Street
 (Photo courtesy of OCPC)**

- Future development – Future development was discussed as a concern that should be addressed as part of any planned improvements. Raynham Park, the former greyhound race track, is approximately two miles south of the study intersection on Route 138 and could be the site of significant future redevelopment. Another site discussed as a point of concern is the vacant lot on the northwest corner of the intersection. It was noted during the audit that while any planned future development of these parcels should be considered in the design of proposed improvements, there are no definitive plans at this time for either site. MassDOT and the Town of Easton should insure that any planned development in the area is considered as part of any future improvements at this location.

Potential Safety Enhancements

After the site visit, audit participants returned to the meeting location to discuss the safety issues and consider improvements. Audit participants were encouraged to consider both short and long term improvements for each issue. Each improvement considered has been categorized as short-term, mid-term, or long-term based on the definitions shown in Table 2. Additionally, a cost category has been assigned to each improvement based on the parameters set forth in Table 2.

Table 2. Estimated Time Frame and Costs Breakdown

Time Frame		Costs	
Short-term	<1 year	Low	<\$10,000
Mid-term	1–3 years	Medium	\$10,001–\$50,000
Long-term	>3 years	High	>\$50,000

The following improvements were suggested by audit participants to improve safety issues associated with the intersection of Foundry Street and Turnpike Street.

- Upgrade traffic signal. A number of potential solutions were discussed related to the upgrade or replacement of the existing traffic signal. Recommendations are as follows:
 - Replace signal. The most extensive solution involves a complete replacement of all signal equipment. Some audit participants suggested that additional signal heads be added to increase visibility for approaching vehicles. It was noted by MassDOT Highway Division District personnel that adding equipment such as new signal heads or a tether wire to the existing span wire assembly would increase the loading on the existing strain poles, which would require checking the original design calculations to insure that the poles and foundations could accommodate additional loading. MassDOT District personnel noted that the original design calculations are likely not available. A complete replacement of all signal equipment should incorporate phasing improvements and be done in conjunction with geometric improvements, which would address safety concerns related to lane geometry, lane assignments and pedestrian accommodation. This is a long-term, high cost improvement.
 - Replace incandescent bulbs with LEDs. It was noted during the audit that the existing traffic signal heads have incandescent bulbs, which are no longer accepted by MassDOT in new signal installations. Bulbs should be replaced with LEDs for all signal heads. LEDs are brighter, which will make them more visible to approaching traffic, and use just 10% of the energy used by incandescent bulbs. This is a short-term, low cost improvement.
 - Install backplates. It was noted by audit participants that there are no backplates on some overhead signal heads, specifically for the single overhead signal head for the westbound Foundry Street approach. Backplates should be installed on all overhead signal heads. This is a short-term, low cost improvement.
- Reapply pavement markings. Pavement markings in the area of the intersection are faded and may lead to driver confusion regarding the two lane configuration on all four approaches. New markings should be applied 400 feet in each direction. This is a short-term, medium cost improvement.
- Define lane configurations and apply arrow/ONLY markings. The lack of existing lane assignment markings causes confusion amongst approaching vehicles. Drivers may assume that they need to be in the right lane to make a through movement, and then be surprised by a vehicle in the left lane also making a through movement and maneuvering to merge into one lane on the departure side of the intersection. Lane configurations should be defined and appropriate pavement markings and signs installed, such as arrow and ONLY markings. Lane configurations should be determined based on new traffic count data and a capacity analysis study of the data to determine whether the left or the right turn movement should be given an exclusive lane. This is a short-term, medium cost improvement, including the cost of the traffic count and capacity analysis study.
- Study clearance times. The existing yellow and all red clearance times should be determined from the existing traffic signal controller and compared to minimum requirements calculated based on the Institute of Transportation Engineers (ITE) methodology. If existing clearance times are insufficient,

clearance times should be increased accordingly. Audit participants suggested this improvement because vehicles have been observed clearing the intersection after the all red phase, but this may also be due to drivers intentionally running the yellow or red light due to the level of delay at the intersection. This is a short-term, low cost improvement.

- Upgrade lighting at the intersection. It was suggested that roadway lighting should be improved in the area. This improvement would involve installing overhead lights on existing utility poles. This is a mid-term, medium cost improvement.
- Replace signal ahead sign. The W3-3 Signal Ahead warning sign on the Foundry Street eastbound approach does not appear to meet current retroreflectivity standards and should be replaced. This is a short-term, low cost improvement. The existing supplemental “Signal Ahead” word plaque should be removed and not replaced.
- Install “Speed Limit” signs. The speed limit along Foundry Street is 25 MPH in the area of the intersection, which is not posted. Speed limit signs should be added on both Foundry Street approaches alerting drivers to this reduced limit. It was suggested by audit participants that a speed zone should be established along Turnpike Street in the area of the intersection, but it was noted by MassDOT personnel that MassDOT no longer employs the practice of establishing reduced speed zones at intersections. This is a short-term, low cost improvement.
- Consider future development. This recommendation is not a specific improvement that can be implemented, but more an overall consideration that should be applied to any future planned improvements at the audit intersection.

Summary of Road Safety Audit

Table 3 summarizes potential recommendations discussed by the audit team. The recommendations are categorized based on the potential safety payoff, as well as by time frame and cost. The safety payoff is a qualitative judgment of the effectiveness of the potential safety improvements.

Table 3. Potential Safety Enhancement Summary

Safety Issue	Safety Enhancement	Safety Payoff	Time Frame	Cost
Signal phasing & timing, Signal Visibility, Signal Alignment, Pedestrian Accommodations, Lane Geometry, Future Development	Replace traffic signal. Include geometric improvements in intersection upgrades.	High	Long-term	\$1,000,000
Signal Visibility	Replace incandescent bulbs with LED's.	Medium	Short-term	\$5,000
Signal Visibility	Install backplates where missing.	Medium	Short-term	\$5,000
Pavement Markings	Reapply pavement markings.	Medium	Short-term	\$20,000
Pavement Markings, Lane Geometry	Define lane configurations, apply arrow and ONLY markings and appropriate signage.	Medium	Short-term	\$6,000
Signal Phasing & Timing	Study clearance times and make changes, if appropriate.	Medium	Short-term	\$2,000
Lighting	Install overhead lights on existing utility poles. Replace bulbs in existing lights, if needed.	Medium	Mid-term	\$20,000
Speed	Install speed limit signs for 25 MPH zone on Foundry Street.	Medium	Short-term	\$400
Downgrade on Foundry St EB	Replace W3-3 Signal Ahead sign.	Low	Short-term	\$200

Appendix A. RSA Meeting Agenda

Agenda

Road Safety Audit

Easton – Foundry Street (Route 106) 2 Intersections
Five Corners and Turnpike Street (Route 138)

Meeting Location: Easton Town Hall, 136 Elm Street
Monday, December 21st, 2009
10:00 AM – 12:30 PM

Type of meeting: High Crash Location – Road Safety Audit
Attendees: Invited Participants to Comprise a Multidisciplinary Team
Please bring: Thoughts and Enthusiasm!!

- 10:00 AM** **Welcome and Introductions**
- 10:15 AM** **Review of Site Specific Material**
- Crash, Speed & Volume Summaries
 - Existing Geometries and Conditions
- 11:00 AM** **Visit the Site**
- Drive to the “Five Corners” intersection Foundry Street / Depot Street / Bay Road
 - As a group, identify areas for improvement
 - Drive to the intersection of Foundry Street / Turnpike Street
 - As a group, identify areas for improvement
- 11:45 AM** **Completion of RSA**
- Finalize discussion on all areas for improvement
 - Discuss potential improvements with pros and cons and record possible countermeasures
- 12:30 PM** **Adjourn for the Day – but the RSA has not ended**

Instructions for Participants:

- Before attending the RSA on December 21st, participants are encouraged to drive through the two intersections and complete/consider elements on the RSA Prompt List with a focus on safety.
- All participants will be actively involved in the process throughout. Participants are encouraged to come with thoughts and ideas, but are reminded that the synergy that develops and respect for others’ opinions are key elements to the success of the overall RSA process.
- After the RSA meeting, participants will be asked to comment and respond to the document materials to assure it is reflective of the RSA completed by the multidisciplinary team.

Appendix B. RSA Audit Team Contact List

Appendix C. Detailed Crash Data

Crash Summary for Foundry Street (Rte 106) and Turnpike Street (Rte 138) Intersection, Easton, MA

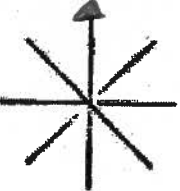

Crash Number	Crash Day	Crash Date	Time of Day	Manner of Collision	Light Condition	Weather Condition	Road Surface	Driver Contributing Code	Driver Ages	Comments
1	Wednesday	January 4, 2006	8:30 AM	Angle	Daylight	Clear	Dry	Unknown	27, 49	
2	Friday	March 24, 2006	8:57 AM	Sideswipe, same direction	Daylight	Clear	Dry	Failure to keep in proper lane or running off road	21, 27	
3	Saturday	April 29, 2006	6:00 PM	Unknown	Unknown	Unknown	Unknown	Unknown	23, 33	Operator cited for operating vehicle after suspension
4	Tuesday	May 30, 2006	8:10 PM	Angle	Dark - lighted roadway	Clear	Dry	Made an improper turn	49, 18	
5	Monday	June 12, 2006	11:57 AM	Angle	Daylight	Clear	Dry	Failed to yield right of way	32, 79	Operator attempted a right turn on red
6	Saturday	July 1, 2006	10:01 AM	Angle	Daylight	Clear	Dry	Disregarded traffic signs, signals, road markings	44, 35	Operator disregarded red light
7	Sunday	July 16, 2006	9:21 PM	Unknown	Dark - lighted roadway	Cloudy	Dry	Disregarded traffic signs, signals, road markings	83, 19, 41	Operator disregarded red light
8	Thursday	August 3, 2006	1:58 PM	Angle	Daylight	Clear	Dry	No improper driving	39, 53	Traffic signal not functioning at time of crash
9	Wednesday	August 30, 2006	5:00 PM	Rear-end	Daylight	Clear	Dry	Inattention	19, 25, 38	Operator driving with suspended license
10	Friday	October 20, 2006	7:30 AM	Angle	Daylight	Clear	Dry	Failed to yield right of way	29, 48	
11	Monday	October 23, 2006	7:33 AM	Angle	Daylight	Fog, Smog, Smoke	Wet	Failed to yield right of way	26, 41	
12	Saturday	November 4, 2006	10:10 AM	Angle	Daylight	Clear	Dry	No improper driving	48, 57	
13	Sunday	November 12, 2006	8:33 AM	Angle	Daylight	Cloudy	Wet	No improper driving	54, 62, unknown	Operator driving with suspended license Crash involved unlicensed driver that did not stop for red light
14	Thursday	November 23, 2006	3:47 AM	Angle	Dark - lighted roadway	Clear	Dry	Inattention	55, 25	Operator went through red light due to inattention
15	Thursday	November 30, 2006	8:52 PM	Angle	Dark - lighted roadway	Clear	Dry	Disregarded traffic signs, signals, road markings	50, 49	Operator went through red light
16	Sunday	January 21, 2007	5:39 PM	Sideswipe, opposite direction	Dark - lighted roadway	Clear	Dry	Failure to keep in proper lane or running off road	52, 48	Operator made an extremely wide turn
17	Saturday	February 10, 2007	12:55 PM	Angle	Daylight	Clear	Dry	Failed to yield right of way	29, 26	
18	Thursday	March 22, 2007	7:35 PM	Angle	Dark - lighted roadway	Cloudy	Wet	Failed to yield right of way	36, 61	
19	Thursday	April 19, 2007	8:36 PM	Angle	Dark - lighted roadway	Clear	Dry	Failed to yield right of way	42, 16	
20	Friday	June 8, 2007	11:22 PM	Rear-end	Dark - lighted roadway	Clear	Dry	Operating vehicle in erratic, reckless, careless, negligent or aggressive manner	17, 51	
21	Thursday	June 21, 2007	3:54 PM	Unknown	Unknown	Unknown	Unknown	Unknown	Unknown	
22	Thursday	June 21, 2007	4:06 PM	Sideswipe, same direction	Daylight	Clear	Dry	Failure to keep in proper lane or running off road	81, 32	
23	Wednesday	July 11, 2007	4:30 PM	Unknown	Unknown	Unknown	Unknown	Unknown	46	Operator struck bicyclist
24	Monday	July 23, 2007	5:01 PM	Angle	Daylight	Cloudy	Dry	Disregarded traffic signs, signals, road markings	80, 57, 18, 49, 37	Operator went through red light
25	Tuesday	November 20, 2007	11:07 AM	Angle	Daylight	Snow	Wet	Disregarded traffic signs, signals, road markings	91, 25	Operator went through red light
26	Wednesday	December 12, 2007	4:52 PM	Rear-end	Dark - lighted roadway	Clear	Dry	Unknown	63, 58	
27	Saturday	April 26, 2008	12:12 PM	Sideswipe, same direction	Daylight	Clear	Dry	Failed to yield right of way	67, 37	
28	Wednesday	June 25, 2008	7:27 AM	Angle	Daylight	Clear	Dry	Failed to yield right of way	29, 45	
29	Tuesday	August 5, 2008	10:55 PM	Angle	Dark - lighted roadway	Cloudy	Dry	Failed to yield right of way	37, 19	
30	Friday	September 26, 2008	2:22 PM	Rear-end	Daylight	Rain	Wet	Followed too closely	40, 19	
31	Wednesday	October 22, 2008	10:21 PM	Sideswipe, opposite direction	Dark - unknown roadway lighting	Rain	Wet	Operating vehicle in erratic, reckless, careless, negligent or aggressive manner	21	Crash possibly involved drunk driver

McCantone

TOWN OF EASTON
SPECIAL SPEED REGULATION NO. 511

Highway Location: TOWN OF EASTON

Authority In Control: TOWN OF EASTON

Name of Highway (s):
 Foundry Street ✓
 Foundry Street and Eastman Street ✓
 Center Street ✓
 Depot Street ✓
 Lincoln Street ✓
 Bay Road
 Turnpike Street ✓
 Main Street ✓

In accordance with the provisions of Chapter 20, Section 18 of the General Laws (Rev. Ed.) as amended, the following Special Speed Regulation is

hereby Adopted

by the Board of Selectmen

of the Town of Easton

That the following speed limits are established at which motor vehicles may be operated in the areas described:

Foundry Street - NORTHBOUND

Beginning at the Norton-Easton line,

Thence northerly in Easton

<i>Rev.</i>	}	1.25 miles at 50 miles per hour	6600 ✓
<i>10-21-71</i>		0.30 " " 40 " " "	1584 ✓
		0.11 " " 20 " " "	ending at Route 106; 580 ✓

the total distance being 1.66 miles.

Foundry Street - SOUTHBOUND

Beginning at a point 600 feet south of Route 106, ✓

Thence southerly on Foundry Street:

<i>10-21-71</i>	}	0.30 miles at 40 miles per hour	1584 ✓
<i>Rev.</i>		1.25 " " 50 " " "	ending at the 6600 ✓

Easton-Norton line; the total distance being 1.55 miles.

Operation of a motor vehicle at a rate of speed in excess of these limits shall be prima facie evidence that such speed is greater than is reasonable and proper.

The provisions of this regulation shall not, however, abrogate in any sense Chapter 90, Section 14, of the General Laws (Ter. Ed.)

Date of Passage _____

Arthur H. Galt

Paul Galt

Attest *Esther C. Anderson*

COMMONWEALTH OF MASSACHUSETTS
DEPARTMENT OF PUBLIC WORKS

SPECIAL SPEED REGULATION NO. 511

The Department of Public Works and the Registrar of Motor Vehicles, acting jointly, do hereby certify that this regulation is consistent with public interest.

Standard signs must be erected at the beginning of each zone.

Date: February 20, 1970

By: Edward J. Ribbs
