FFY 2022 OLD COLONY UPWP ANNUAL REPORT AND ACTIVITIES SUMMARY

1.0 - INTRODUCTION AND SUMMARY

The Old Colony Planning Council (OCPC) has prepared the FFY 2022 Old Colony Unified Planning Work Program (UPWP) Annual Progress Report. The Annual Progress Report provides the Progress and Products accomplished during FFY 2022. The Annual Report also provides financial information regarding the Combined PL 5303 Expenditures through MassDOT Contract 114676.

The Old Colony Metropolitan Planning Organization (MPO) is responsible for conducting a continuing, cooperative, and comprehensive transportation planning process that results in plans, programs, and projects that encompass all transportation modes and that support the region's vision and communities' goals. The Old Colony MPO plans for the movement of both people and goods within the region by all modes of travel, including highways, rail, public transportation, bicycles, and foot. Importantly, it also plans for the connections linking these modes.

The FFY 2022 Old Colony Unified Planning Work Program (UPWP) describes and provides budgetary information for the transportation planning tasks and activities, which are to be conducted in the region during the coming year. The UPWP is a federally required certification document, which is prepared and endorsed annually by the Old Colony MPO, prior to the start of the planning program. The Old Colony Planning Council (OCPC) has the responsibility of preparing the UPWP and conducting the tasks contained here within. The planning activities are organized first by task element in a format that will allow efficient administration, management, and reporting. For convenience in management, similar tasks are grouped into the following elements:

- 1000 - Management and Support of the Planning Process and Certification Activities
- 2000 - Data Reconnaissance, Acquisition, and Analysis Activities
- 3000 - Short Range and Long-Range Transportation Planning Activities
- 4000 - Other Transportation Technical Activities

The FFY 2022 Old Colony UPWP efforts focused on the development of Road safety Audits at Multiple Locations, the High Priority Corridor Screen Assessment, and the Freight Planning and Action Plan, the Bipartisan Infrastructure Law (BIL) Performance Management and related Performance Measures and Target development, continued development of the Regional Travel Demand Model (TransCAD), operation of the Congestion Management Process, operation of the Safety Management System, operation of the Pavement Management System, and the development of the Transportation Improvement Program. Attention also focused on the regional multi-modal data surveillance program (including counting of bicycles and pedestrians, developing an inventory of gaps in the bicycle network, and developing an index of regional bikeability), maintaining regional databases, adjusting, and amending certification documents as needed, and implementing the management systems. OCPC continues to integrate the Geographic Information Systems into various tasks and plans undertaken.

Aside from the planned activities contained in the FFY 2022 UPWP, the staff adapted and continued to respond to the COVID-19 Pandemic by continuing virtual public engagement for meetings of the Old Colony JTC, Old Colony MPO, and Road Safety Audits. On July 16, Lieutenant

OLD COLONY PLANNING COUNCIL (OCPC)
FFY 2022 OLD COLONY UPWP ANNUAL REPORT AND ACTIVITIES SUMMARY

Gov. Karyn Polito, as acting governor, signed legislation to extend key pandemic-era accommodations, including remote local government meeting authorizations, through March 31, 2023. This Act includes an extension of the remote meeting provisions of Governor Baker's March 12, 2020, Executive Order Suspending Certain Provisions of the Open Meeting Law. The staff also continued tracking of traffic volume trends compared to stages of Massachusetts Re-Opening Phases and have posted this information to the OCPC Website at: http://www.ocpcrpa.org/traffic_during_covid.html. With the continuation of the traffic counting program, staff completed the requested MassDOT Traffic Count Program and conducted traffic counts as part of the Local Technical Assistance Program and several locations to monitor local traffic trends. Furthering the adaptation, was the continued research on the applications of Unmanned Aerial Vehicles (UAVs) commonly referred to as "drones" and provision of drone technical assistance flights in response to member community requests.

2.0 - 3C CONTRACT RETROSPECTIVE

In a continued response to a 3C Contract retrospective that the MassDOT Office of Transportation Planning provided for FFY 2015, OCPC offers the following discussion of the variability of monthly expenditures for FFY 2022.

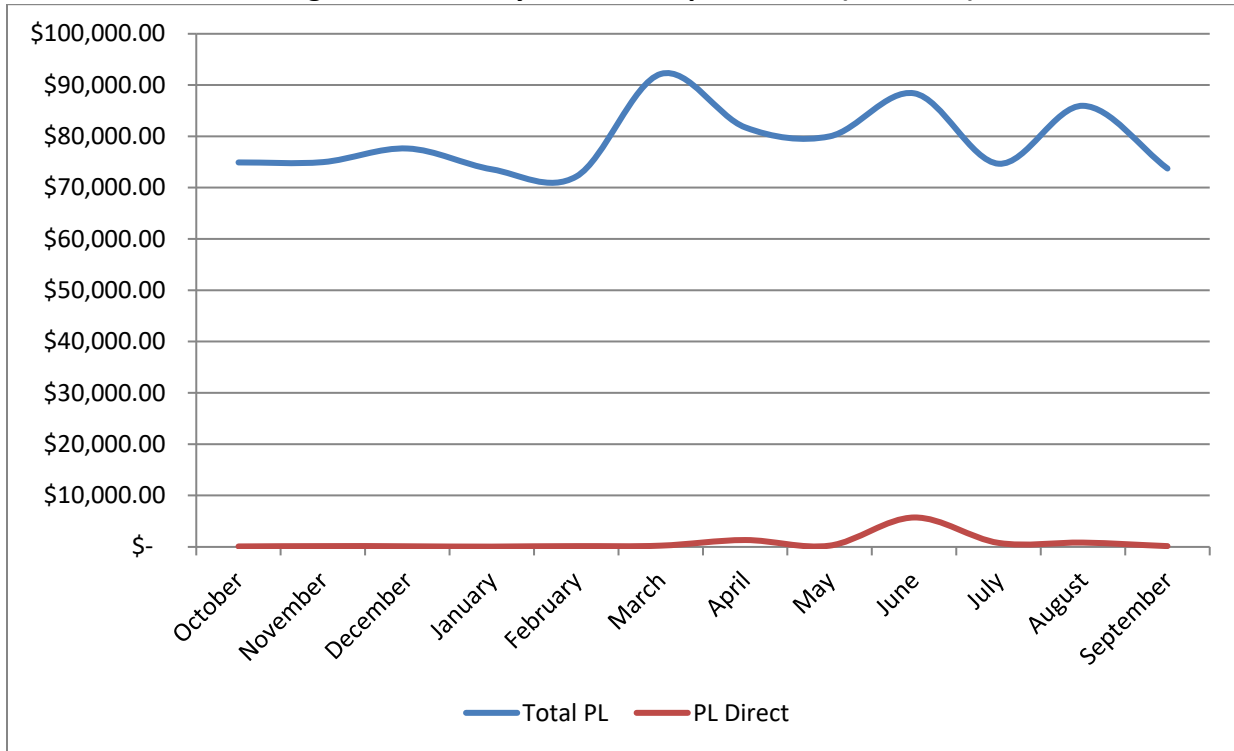

The monthly invoicing period mirror the monthly OCPC financial periods. The monthly billing period covers the first eligible weekday of the month to the last eligible weekday of the month. This allows for uniformity in invoicing amounts. Figure One provides a depiction of the weekdays and eligible weekdays (weekday - holidays) by month for FFY 2022, while Figure 2 provides the expenditures by month. From an examination of the patterns presented in Figures 1 and 2, a general conclusion is that the distribution of expenditures by month approximates the pattern of eligible weekdays by month.

Figure 1 - Weekdays and Eligible Weekdays by Month (FFY 2022)

**OLD COLONY PLANNING COUNCIL (OCPC)
FFY 2022 OLD COLONY UPWP ANNUAL REPORT AND ACTIVITIES SUMMARY**

Figure 2 - Monthly Contract Expenditures (FFY 2022)

During FFY 2022, OCPC balanced larger direct cost expenditures mostly evenly across the twelve months. While the expenditures for legal advertisements for the TIP, TIP Amendments, LRTP, and UPWP are dependent on when the Old Colony MPO commences the public review and comment period, the other larger PL direct costs were made during different portions of the year.

During FFY 2022, the average monthly direct cost expenditure was \$821.27, and ten (8) of the twelve (10) months experienced PL direct cost expenditures under \$1,000. The month of June 2022 experienced an overall direct cost expenditure of \$5,717.41. These expenditures included the payments related to the annual licensing of the Pavement Management Software (Cartegraph) in the amount of \$3,937.50. It is noted that all direct costs for \$1,000 or greater must receive approval from MassDOT prior to purchase. Overall mileage expenses for FFY 2022 were \$1,315.27, and this amount was the lowest total since before 2005.

- Staff continued congestion, safety, and pavement related analyses for transportation studies.
- Staff continued data research from Census, CTPP and ACS data platforms in support of Socioeconomic Projection Committee initiatives, through coordination with Caliper and research in ACS and Census website.
- Staff continued development of Safety Management System (SMS) (reviewing of measures identifying safety issues at high hazard locations through a data collection effort, which includes, but is not limited to the following: conducting turning movement counts, reviewing crash diagrams, calculating crash rates, vehicle volume studies, vehicle speed studies, vehicle classification studies and pedestrian studies).
- Staff continued review of existing Congestion Management Process (CMP) plans and programs and analyzing results of monitoring.
- Staff continued work on updating projects in MassBuilds, as appropriate.
- Staff coordinated with MassDOT and MBTA on railroad safety (grade crossings and trespassers) in the region.
- Staff developed a GIS database for regional traffic volume/capacity (VC Ratio) analysis by using MassDOT 2019 Road Inventory File and OCPC Travel Demand Model.
- Staff continued development of OCPC Travel Demand Model, including: 1. Review Census Block Group data and created new generation TAZ model, 2. Researched in Census Data and gathering 2016-2020 5-year average American Community Survey Data information. 2. Studied OCPC regional traffic network data, 3. Developed and updated Base Year Traffic Network by using 2019 MassDOT Road Inventory File, including de-selecting non-model links. 4. Constructed external stations network nodes and links. 5. Verified land use data and error checking for traffic network. 6. Compiled and reviewed intersection database in preparation of constructing base year network nodes.
- Staff developed congested locations list and map based on the findings from volume and capacity ratio analysis and estimation.
- Staff developed GIS database and heat map showing Five Year OCPC Regional Crash Location including types of severity.
- Staff incorporated data and findings from the State, Socioeconomic Projections Committee, and Census (ACS) to assist updating OCPC Travel Demand Model. Reviewed and compiling socioeconomic data in development of OCPC Travel Demand Model TAZ files and Trip Generation Model with TransCAD Version 9.0.
- Staff prepared Travel Demand Model Technical Memorandum including information of development process and user training material.
- Staff provided payment for Cartegraph Pavement Management System Annual License.
- Staff purchased and provided payment for two (2) iPad tablets for utilization with pavement management software, data collection, and surveys.
- Staff researched in INRIX Signals Scorecard Map, Probe Data Analytics, Conveyal, and Google Street map, Traffic Archive in support of High Priority Corridor Screening Assessment Study, Freight Plan Study, Travel Demand Model updates, Complete Street Program, Safe Route to School, and Bicycle and Pedestrian planning initiatives.
- Staff researched railroad safety statistics (specifically injuries and fatalities of pedestrians on the ROW) in the Old Colony region.

OLD COLONY PLANNING COUNCIL (OCPC)
FFY 2022 OLD COLONY UPWP ANNUAL REPORT AND ACTIVITIES SUMMARY

- Staff reviewed and compiled Socioeconomic data with TransCAD in preparation of Travel Demand Model updates in preparation of base year model Trip Generation Model.
- Staff updated Safety Management System tracking of EPDO on federal-aid eligible intersections in the Old Colony region with 2019-2021 data.

Upon receipt of the detailed results of the most recent Statewide Travel Demand Model, the MPO will prepare a full discussion of the modeling results, anticipated future demand, and how implementation of the plan will impact that demand and the transportation system within the region for inclusion in the 2020-2040 MTP. The MPO will then prepare an amendment to the 2020-2040 MTP to include this information (Target date of June 2021.)</p> <p>MassDOT and Old Colony Planning will work collaboratively so that in all future updates of the MTP, the MPO will include a full discussion of the modeling results, anticipated future demand, and how implementation of the plan will impact that demand and the transportation system within the region. (Target date of December 2022 for Draft MTP.)</p>	<p>Planning Council</p>	<p>December 2022</p>	<p>In July 2020, OCPC contacted MassDOT and CTPS to discuss and commence coordination efforts. Additionally, OCPC met virtually with CTPS in July 2020 to further discuss and define process. The Boston MPO has a modeling task in their FFY 2021 UPWP to provide results of statewide travel model to MPOs.</p> <p>A Southern Boston UZA Coordination Meeting was February 3, 2021. The topic of travel demand models was discussed. The work of the CTPS continues regarding their task of developing and providing results of statewide travel model to MPOs.</p> <p>In February 2021, OCPC consulted with FHWA and MassDOT and it was the determination that the current 2020 MTP would not have to be amended to include a full discussion of the modeling results, anticipated future demand, and how implementation of the plan will impact that demand and the transportation system within the region.</p> <p>In November 2021, OCPC consulted with CTPS staff to obtain their 2019 travel demand model files. This would assist OCPC with developing its travel demand model. Nevertheless, OCPC continues to develop its own travel demand model.</p> <p>OCPC continues to develop its own travel demand model and will work closely with MassDOT so that in all future updates of the MTP, the MPO will include a full discussion of the modeling results, anticipated future demand, and how implementation of the plan will impact that demand and the transportation system within the region. The staff continues to participate in the Socioeconomic Projections Committee Meetings and is awaiting the projections for the 2019–2050-time bands. Combined with this effort, staff continued review and comment of projections development for population, households, and employment in preparation for the 2050 Long Range Transportation Plan.</p>

The MPO is working with BAT to document non-recurring congestion related to crashes. Staff researched data related to documentation of non-recurring congestion related to work zones, and crashes. Staff began review of potential for utilization of StreetLight and will set up demonstration with vendor in July and have then follow up discussion with MassDOT on their experience.</p> <p>Brockton Area Transit is currently in the process of implementing automated passenger counters (APCs) on their fixed route buses. This technology will provide real time passenger loads by each bus as it travels its fixed route. This will enable the MPO to screen and develop passenger load information to assess which routes and route segments are congested. OCPC has had discussions with BAT regarding obtaining and then processing and analyzing Automatic Vehicle Location System (AVL) data and Automated Passenger Counter (APC) data.</p>

8. Title VI Civil Rights				
<p>Recommendation: While there is no indication or evidence of non-compliance with Title VI requirements, it is recommended the MPO host a brief training/workshop on disparate-impact discrimination for the representatives of the cities and towns that comprise the region. The intent is to take a proactive approach to ensure all sub-recipients of federal financial aid are knowledgeable of Title VI requirements which bars intentional discrimination as well as disparate-impact discrimination stemming from a neutral policy or practice that has the effect of a disparate impact on protected groups based on race, color, or national origin. MassDOT which is the direct recipient federal financial aid may serve as the source or conduit for the training.</p>	<p>The MPO, in coordination with MassDOT's Office of Diversity and Civil Rights, will host a training/workshop on disparate-impact discrimination for the representatives of the communities that comprise the region (Target date of December 2020.)</p>	<p>MassDOT, Old Colony Planning Council</p>	<p>December 2020</p>	<p>Completed.</p> <p>Old Colony Planning Council coordinated with the MassDOT Office of Diversity and the MassDOT Office of Transportation on the training/workshop.</p> <p>As such, the workshop entitled "Understanding Disparate Impact in Old Colony Metropolitan Planning Organization (MPO) Activities and Decision Making" was held on November 5, 2020.
